Polaris is planning to set up a banking and financial application certification centre in Belfast, Northern Ireland. It also plans to invest EUR 14.41 million and employ approximately 150 people in the centre. This new centre in Belfast will be a part of Polaris Software Lab Limited UK.

Factors for Success

Customised Solutions

Polaris has been able to provide solutions that suit its clients' requirements. Polaris has invested heavily in the EU to acquire the necessary domain and technological edge to provide client-focused and asset-based solutions. Polaris has also changed its selling methodology and reoriented its sales team through fresh hiring and involvement of solution specialists at the front end. This move is intended to enable the sales team to target potential clients more effectively.

Domain Expertise

Polaris possesses strong expertise in banking, financial services and insurance (BFSI). Polaris' investments were centered on these segments to increase the revenues from them. The company to gain a foothold in the EU leveraged this domain expertise.

Future Plans

Polaris wants to continue its focus on the banking, financial services and insurance (BFSI) industry so that it can build its expertise in these areas and provide better solutions to its clients. It plans to form alliances with firms in the EU and the USA to enhance its reach to customers. It wants to further penetrate the European market by providing advanced technology products and services to its clients.
