Executive summary

2. HIGHLY DIVERSIFIED

- As of 2019, the Indian chemicals industry accounted for 7% of the GDP and contributed 4% to the total FDI equity inflows and ~8% to the country’s exports. The industry is highly diversified, covering >80,000 products and employing >2 million people.
- The chemical industry is expected to contribute US$ 300 billion to India’s GDP by 2025.

1. GLOBAL POSITION

Globally, India is the third-largest consumer of polymers, fourth-largest producer of agrochemicals and sixth-largest producer of chemicals. In 2019, the Indian chemicals market stood at US$ 178 billion and is forecast to reach US$ 304 billion by 2025.

3. STRONG GROWTH IN SPECIALTY CHEMICALS

- The specialty chemicals sector witnessed a significant growth of ~14% since 2015 and is expected to reach US$ 70 billion by end-2020, followed by a CAGR of ~12-13% over the next five years.
- The key segments of specialty chemicals—including personal care and paints & coatings—are likely to witness CAGR of ~13% and ~10%, respectively.
- Also, ICRA’s ratings indicate improved exports and a positive outlook for agrochemicals and surfactants.

4. LARGEST GLOBAL DYE SUPPLIER

- India is the second-largest manufacturer and exporter of dyes and accounts for ~16% of the world production.

Notes: GDP: Gross Domestic Product, FDI: Foreign Direct Investment, CAGR: Compounded Annual Growth Rate
Source: Department of Chemicals and Petrochemicals
Advantage India
Advantage India

1. Growing demand
   - Rise in demand from end-user industries such as food processing, personal care and home care is driving development of different segments in India’s specialty chemicals market.

2. Increasing investments and spending
   - PCPIRs are expected to attract investments worth Rs. 7.63 lakh crore (US$ 104.36 billion).
   - Indian chemical companies spend ~1% of their revenue on R&D.

3. Policy support
   - The government plans to introduce production-linked incentive (PLI) scheme to promote domestic manufacturing of agrochemicals.
   - Under the Union Budget 2021-22, the government allocated Rs. 233.14 crore (US$ 32.2 million) to the Department of Chemicals and Petrochemicals.

4. Opportunities
   - India’s specialty chemicals companies are expanding their capacities to cater to rising demand from domestic and overseas.
   - With global companies seeking to de-risk their supply chains, which are dependent on China, the chemical sector in India has the opportunity for a significant growth.

Source: Budget 2020-21, News Articles, DPIIT, *Ultratech investors presentation May 2018
Market Overview
Chemicals industry in India covers >80,000 commercial products.

India’s chemicals industry is de-licensed, except for a few hazardous chemicals.

The industry is expected to reach US$ 304 billion by 2025 at a CAGR of 9.3%, driven by rising demand in the end-user segments for specialty chemicals and petrochemicals segment.

Specialty chemicals constitute for 22% of the total chemicals and petrochemicals market in India. Demand for specialty chemicals is expected to register 12% CAGR in 2019-22.

Specialty chemical companies are seeking at import substitutions while exploring export opportunities to accelerate their business.

The petrochemical demand is expected to record a 7.5% CAGR between 2019 and 2023, with the demand for polymers growing at 8%.

The agrochemicals market in India is expected to register 8% CAGR to reach US$ 3.7 billion by FY22 and US$ 4.7 billion by FY25.

In January 2020, exports of organic and inorganic chemicals grew 2.55 % YoY.

The country ranks 14th in exports and 8th in imports of chemicals worldwide.

Source: Department of Chemicals and Petrochemicals,
1. **Bulk chemicals**
   - These are groups of chemicals, which are manufactured on a large scale and further divided into organic, inorganic, and alkali chemicals.

2. **Petrochemicals & polymers**
   - These chemicals are derivative of several chemical compounds such as hydrocarbons, which are derived from crude oil or natural gas.

3. **Fertilisers**
   - These provide nutrients for plant growth; are divided into organic/inorganic and natural/synthetic. Further, these can be broadly classified into phosphate, potassium, and nitrogenous.

4. **Specialty chemicals**
   - These are derivatives of basic chemicals that are manufactured for specific end-use solutions. The characteristics of these chemicals include high-value, high R&D, and low volume.

5. **Agrochemicals**
   - These chemicals are used to protect crops against insects and pests and include fungicides, herbicides, and insecticides, among others. These chemicals can be applied in water irrigation, seeds, soils, and crops.

---

**Chemical's market is split into five key segments**

1. Bulk chemicals
2. Petrochemicals & polymers
3. Fertilisers
4. Specialty chemicals
5. Agrochemicals

Recent Trends and Strategies
In October 2020, production of key chemicals was 880,569 MT and petrochemicals was 1,808,997 MT.

In October 2020, production of selected chemicals increased 5.3% over September 2020, while petrochemicals production grew 4.8%.

Notes: MT: metric tonnes
Source: Department of Chemicals and Petrochemicals
Chemical sector import and export statistics

- In November 2020, exports of organic and inorganic chemicals increased 10.8% YoY to reach US$ 2,087.60 million.
- For petrochemicals, imports of petroleum and crude products decreased 10.6% YoY to reach US$ 9,581.85 million in December 2020.
- India holds a strong position in exports and imports of chemicals at a global level and ranks 14th in exports and 8th in imports at global level (excluding pharmaceuticals).

Note: Import includes data for both organic and inorganic chemicals and chemicals materials and products; Export data includes only organic and inorganic chemicals.

Source: Department of Chemicals and Petrochemicals,
Agrochemical trends in India

- Globally, India is the fourth-largest producer of agrochemicals after the United States, Japan and China.
- The Indian agrochemicals market is expected to register an 8% CAGR to reach US$ 3.7 billion by FY22 and US$ 4.7 billion by FY25.
- India is the fourth largest exporter of agrochemicals and the thirteenth-largest exporter of pesticides and disinfectants. The country’s exports have increased on the account of low-cost manufacturing, availability of technically trained manpower, seasonal domestic demand, overcapacity, competitive pricing and strong presence in generic pesticide manufacturing.
- Rise in demand in the agricultural segment is driving growth of agrochemicals in India.
- In October 2020, the government urged players in the agrochemicals industry to come out with new molecules of global standards for the farmers’ benefit, while CropLife India, the industry body, pitched for stable policies and regulatory regimes to boost growth in the sector.
- In December 2020, India witnessed unrealized potential for growth in agrochemicals and is focusing on development of new products and judicious use of pesticides.
- The current GST on agrochemical is 18%. In January 2021, CropLife India, an industry body, demanded the government to reduce GST as this will help lower prices of agrochemicals and benefit farmers.

Source: Ministry of Chemical & Petrochemical Statistics, News Articles
Chemical trends in India

- Alkali chemicals accounted for ~69% of the total chemical production in 2019 and 71% from April to September in the same year.

- Soda ash registered a CAGR of 5.54% from 2013 to 2019; its demand is expected to rise with applications in dyes, colouring agents, synthetic detergents and fertilisers in India.

- Government initiatives such as promotion of small and midsized ‘Sodium Bicarbonate’ and ‘Ammonia’ processing industries in proximity to soda ash manufacturing units is likely to boost demand for soda ash in the country.

**Source:** Ministry of Chemical & Petrochemical Statistics
Petroleum, chemicals and petrochemicals investment region (PCPIR)

To promote investments and development in this sector, Indian government approved four PCPIRs

- **Location/Region**: Dahej  
  **Date of Approval**: Feb. 2009  
  **Total Area**: 453 Sq. Kms  
  **Processing Area**: 248 Sq. Kms  
  **Anchor Tenant**: ONGC Petro-additional Ltd.

- **Location/Region**: Paradeep  
  **Date of Approval**: Dec. 2010  
  **Total Area**: 284.15 Sq. Kms  
  **Processing Area**: 123 Sq. Kms  
  **Anchor Tenant**: Indian Oil Corporation Ltd.

- **Location/Region**: Cuddalore  
  **Date of Approval**: July 2012  
  **Total Area**: 257 Sq. Kms  
  **Processing Area**: 104 Sq. Kms  
  **Anchor Tenant**: Nagarjuna Oil Corporation Ltd.

- **Location/Region**: Vishakhapatnam  
  **Date of Approval**: Feb. 2009  
  **Total Area**: 604 Sq. Kms  
  **Processing Area**: 270 Sq. Kms  
  **Anchor Tenant**: Hindustan Petroleum Corporation Ltd.

- PCPIR in Dahej, Gujarat attracted more investments-compared with the other three cities-wherein various Indian and multinational companies such as ONGC, GACL, OPAL, BASF and LANXESS have opened facilities.

- In December 2020, the PCPIR policy is being completely redesigned. Under the new PCPIR Policy 2020-35, it has been targeted to attract a combined investment of Rs. 10 lakh crore (US$ 142 billion) by the year 2025, Rs. 15 lakh crore (US$ 213 billion) by 2030 and Rs. 20 lakh crore (US$ 284 billion) by 2035 in all the PCPIRs across the country.

- The four PCPIRs are expected to generate employment for ~33.83 lakh people. ~3.50 lakh persons have been employed in direct and indirect activities related to PCPIRs by the end of 2020.

Chemical players focusing on sustainable development

Indian chemical companies are investing in innovative solutions, focusing on issues such as water, environmental impact, raw materials, safety over lifecycle and energy use.

1. Tata Chemicals
   - Tata Chemicals commissioned a solar photo-voltaic plant to save energy.
   - With an aim to control greenhouse gas emissions, it proposed to establish a 150 kWp grid-connected solar photovoltaic power plant on the rooftop terrace of the electrical sub-station.

2. Kanoria Chemicals & Industries Limited
   - The company’s AlcoChem Ankleshwar Division runs ‘waste to wealth’ programme, which involves treatment of effluent and recycling water by a ‘Reverse Osmosis’ process developed by the company.

   - The company adopted technology to recycle >98% of water and reuse >90% of salt.
   - The process consisted of a pre-treatment system, followed by water recovery system using reverse osmosis.

Growth Drivers
Strong demand and policy support driving investments

- Growing demand:
  - Higher real disposable incomes
  - Shift in production and consumption towards Asian and Southeast Asian countries
  - Shift in consumer preference towards environment-friendly products

- Policy support:
  - 100% FDI under the automatic route in the chemical sector, except for hazardous chemicals
  - MSIHC Rules to be merged with CAEPPR to safely handle hazardous chemicals

- Increasing investment:
  - Establishing PCPIRs (investment regions for petroleum, chemicals and petrochemicals)
  - Domestic and overseas companies investing in greenfield or brownfield projects
  - Increase in FDI investments

Notes: MSIHC: Manufacture Storage and Import of Hazardous Chemicals, CAEPPR: Chemical Accidents Emergency Planning, Preparedness and Response
Source: News Articles
Key growth drivers…(1/2)

Rise in domestic demand
- By 2030, India is likely to have ~80% of the households in the middle-income group.
- The growing middle-class and increasing urbanisation is driving the demand for personal care, agrochemicals, food, paints & coatings resulting into higher consumption of chemicals per capita.

Government aims to boost manufacturing share in GDP to 20% by 2025
- Government considers the manufacturing sector to be a key focus area and has contacted ~1,450 companies worldwide to manufacture in India.
- The government plan includes 2-3 autonomous zones which does not have labor and land laws.
- ~300 companies are actively pursuing production plans in mobiles, electronics, medical devices and textiles.

Middle-class Growth in India (million)
- CAGR 7.4%
- FY18: 63
- FY19: 68
- FY20: 73
- FY21: 78
- FY22: 84
- FY23: 90
- FY24: 97
- FY25: 104
- FY30: 148

Key growth drivers...(2/2)

1. **EMERGING MANUFACTURING HUBS**
The dedicated integrated manufacturing hubs under Petroleum, Chemicals and Petrochemicals Investment Regions (PCPIR) policy to attract an investment of Rs. 20 lakh crore (US$ 276.46 billion) by 2035.

2. **RISE IN DISINFECTANT DEMAND POST COVID-19**
With increasing demand for disinfestation of personal and public places post COVID-19, the chloro-alkali, ethanol, personal care, and surfactant industry is expected to record significant growth in near future.

3. **FOREIGN INVESTMENT**
Presence of prominent global players, such as BASF, Dow Chemicals, Bayer and others, 100% FDI in the chemicals sector and stringent laws on anti-dumping to drive the Indian chemical market.

4. **SKILLED AND LOW-COST MANPOWER**
The skilled and low-cost labour, world-class engineering and strong R&D set-up enable chemicals industries in India.

5. **GROWING END USE INDUSTRIES**
Demand from packaging, construction, automotive and other industries to drive the Indian chemical market.
2. WATER TREATMENT

- Increasing urbanisation and population is driving the demand for safe drinking water. Moreover, rising awareness of hygiene among the people is leading to excessive water consumption.

3. TEXTILE, FLAVOURS & FRAGRANCES

- India has witnessed increasing demand for wide range of cosmetic chemicals, health care products and hygiene products that use specialty chemicals, polymers and oleo chemicals. This segment is likely to outperform other segments.

1. AUTOMOTIVE

- Disruption in automotive sector with the emergence of autonomous driving, connected cars, electric vehicles and shared mobility will affect the value chain of Indian chemical companies supplying chemicals to automotive applications.

4. CONSTRUCTION

- ‘Smart City’ projects by the Indian government are driving growth of chemical companies in India. Availability of essential raw materials at low cost is anticipated to increase demand for construction chemicals.

Source: News Articles
**Recent developments and investments by key players (1/2)**

1. **Rise in production**
   - HIL (Hindustan Insecticides Limited) signed a memorandum of understanding with the Department of Chemicals & Petro Chemicals to achieve revenue target of Rs. 451 crore (US$ 60.86 million)
   - In October 2020, HIL manufactured its highest-ever production of >530 tonne of Malathion Technical in the first two quarters of the year.

2. **M&As**
   - Pidilite Industries acquired Huntsman Group's Indian subsidiary for Rs. 2,100 crore (US$ 283.38 million) to strengthen its adhesives and sealants portfolio and complement its retail portfolio.

3. **Self-reliant in fertilisers**
   - By 2023, India will be self-reliant in fertiliser production and reduce import dependency, by establishing new units covering an investment of Rs.400 billion. At present, Indian fertiliser production stands at 42-45 million tonnes and imports at 18 million tonnes.

4. **Public-private partnership (PPP) model**
   - Bhoramdev Cooperative Sugar Factory Kawardha and Chhattisgarh Distillery’s subsidiary NKJ Biofuel signed a memorandum of understanding (MoU) for the country's first ethanol plant to be set up in the state under the public-private partnership (PPP) model.

*Source: Company Websites, News Sources,*
**Sulphonation plant set up**
- Ultramarine & pigments have successfully commissioned the Sulphonation plant setup in Nellore, Andhra Pradesh, to manufacture surfactants and specialty chemicals.

**Skills and technical support**
- Central Institute of Petrochemicals Engineering & Technology (CIPET), under the Ministry of Chemicals and Fertilisers, will establish two new ‘Centres for Skilling and Technical Support’ (CSTS) at Bhagalpur, Bihar and Varanasi, Uttar Pradesh. This will act as a catalyst for development and growth of new and existing industries in the region.

**International collaboration**
- Prince Pipes and Fittings (PPFL) entered into a technical collaboration with Tooling Holland, an international plastic injection moulding industry, based in The Netherlands
- Germany headquartered SCHOTT AG, an international specialty glass and technical ceramic materials manufacturer, increases sales in India and plans record investments.

*Source: Company Websites, News Sources,*
Opportunities
Specialty chemical companies in India have started accelerating their capex plan on the back of strong growth visibility and emerging opportunities.

- Due to growing environmental concerns, many chemical companies in China ceased activities in 2018; this led to an increase in manufacturing of specialty chemicals in the Indian market to ensure uninterrupted supply.

**Key growth drivers in the end-user industry for specialty chemicals include the following:**

- Paints & coatings: Increase in urbanisation, increase in middle-income households, high replacement demand and increase in per capita income.
- Textile: Increase in Indian export, increase in urbanisation and higher disposal income.
- Construction: Low expenditure on admixtures compared with China and the US.
- Home care: Increased consumption.

A 2034 vision for the chemicals and petrochemicals sector has been set up by the government to explore opportunities to improve domestic production, reduce imports and attract investments in the sector. The government plans to implement production-link incentive system with 10-20% output incentives for the agrochemical sector; to create an end-to-end manufacturing ecosystem through the growth of clusters.

1. 100% FDI is allowed in the chemical sector under automatic route with exception to few hazardous chemicals

2. Industrial licensing is approved in most sectors, except for few hazardous chemicals

3. The Indian Government supports the industry in research & development, reduced the basic customs duty on several products and offers support through the ‘Make in India’ campaign

4. Four Petroleum, Chemicals and Petrochemical Investment Regions (PCPIRs) have been set up as the investment regions for petroleum, chemicals and petrochemicals along with associated services

Source: Department of Chemicals and Petrochemicals,
The Government of India is considering launching a production-linked incentive (PLI) scheme in the chemical sector to boost domestic manufacturing and exports.

Source: Department of Chemicals and Petrochemicals,
Chemical industry: Exploring new opportunities

2. ALTERNATIVE AND LOW-COST FEEDSTOCK
- In November 2020, NextChem, and Indian Oil Corp. Ltd. (IndianOil) signed a memorandum of understanding (MOU) to use NextChem technologies to build industrial projects to support industrialisation of India’s sustainable development.
- The projects would emphasise on recycling of plastics, production of biofuels from renewable feedstock and circular fuels and non-recyclable waste chemicals.

3. GLOBAL FOOTPRINT AND CUSTOMER SEGMENTS
- **Aarti Industries** generates >40% revenue from the global markets.
- **UPL** has presence in multiple markets with >30% of its revenue generated from Latin America.
- **SH Kelkar** has completed several strategic acquisitions, including China-based Anhui Ruibang Aroma and Italy’s Creative Flavours and Fragrances; this helped expand its portfolio, improve technological platforms and gain access to new markets.

1. VALUE-CHAIN INTEGRATION
- **Camlin Fine Sciences** acquired Borregaard Italia Spa, a raw-material catechol manufacture, and Ningbo Wanglong, an end-product vanillin flavour manufacturer.
- The vertical integration made CFS the third-largest vanillin producer worldwide.

4. EXPOSURE TO CUTTING-EDGE TECHNOLOGIES
- **Atul Chemicals**, partnered with Akzo Nobel to access state-of-the-art eco-friendly hydrogenation technology for monocloroacetic acid (MCA) production in India.

Many Indian chemical companies are focussing on attaining scale to build their margins and enhance environmental sustainability
