CHEMICALS

MAY 2017 (As of 19 May 2017)

For updated information, please visit www.ibef.org
EXECUTIVE SUMMARY

Leading position globally

- In terms of value & production volume, Indian chemical industry is the 3rd largest producer in Asia & 7th by output in the world. Indian chemical industry could grow at 11 per cent p.a. to reach size of USD224 billion by 2017.
- In 2016, India chemicals industry had a market size of USD139 billion.
- India is 4th largest global producer of agrochemicals in 2016.
- By 2025, the Indian chemical industry is projected to reach USD403 billion.

High GDP share

- The chemical industry in India is a key constituent of Indian economy, accounting for about 2.11 per cent of the GDP.
- More than 70,000 commercial products such as petrochemicals & basic chemicals are covered under chemical sector.

Global dye supplier

- India accounts for approximately 16 per cent of the world production of dyestuff & dye intermediates, particularly for reactive acid & direct dyes.

Global player in specialty chemicals

- India is currently the world’s 3rd largest consumer of polymers & 3rd largest producer of agrochemicals.
- Indian specialty chemical market is expected to reach USD70 billion by 2020.

Increasing exports of inorganic and organic Chemicals

- Value exports of inorganic chemicals from India is estimated at USD1.21 billion in FY16, with the organic chemical market reaching USD11.51 billion in FY16. Exports of organic chemicals from India stood at USD4.02 billion in FY16.(1)

Advantage India

**Robust Demand**
- A large population, dependence on agriculture & strong export demand are the key growth drivers for the chemicals industry.
- Per-capita consumption of chemicals in India is lower relative to Western peers & there exists a large latent demand.

**Attractive Opportunities**
- Polymers & agrochemicals industries in India present immense growth opportunities.
- In FY15, India’s construction chemical market was valued at USD589.58 million, thereby representing ample growth opportunity in chemical sector.
- In 2016, polymer production in India was recorded at around 9 million tons.

**Increasing Investments**
- Lured by the size & returns of the Indian market, foreign firms have strengthened their presence in India.
- From April 2000 to December 2016, total FDI inflows into the Indian chemicals industry (excluding fertilisers) were USD12.68 billion.

**Policy Support**
- In 2015, CII launched 2nd phase of “Chemistry Everywhere” campaign to boost the growth of chemical industry in India.
- 100 per cent FDI is permissible in the Indian chemicals sector; manufacturing of most chemical products is de-licensed.
- Setting up of PCPIRs.
- The Government of India has launched the Draft National Chemical Policy, which aims to increase the share of chemical sector in the country’s GDP.

**Market Size**
- 2016: USD139 billion
- 2017E: USD224 billion

Source: FICCI, Make in India, Department of Industrial Policy and Promotion (DIPP), TechSci Research.
Notes: PCPIR - Petroleum, Chemicals and Petrochemical Investment Regions, CII – Confederation of Indian Industry; E – Estimates.
MARKET OVERVIEW AND TRENDS
CHEMICALS

EVOLUTION OF THE INDIAN CHEMICAL INDUSTRY

Source: FICCI, Make in India, CII, TechSci Research
Note: MNC – Multinational Corporation, DCPC - Department of Chemicals and Petrochemicals

Basic needs (1950-72)
- Chemical products to protect crops
- Agrochemicals, dyes, pharmaceuticals

Establishment (1972-80)
- Public sector companies were set up to develop the petrochemical industry
- Plastic & fibres, petrochemical products

Consolidation (1980-92)
- Consolidation started from largely fragmented firms with small capacities & high cost structures
- Paints, dyes, pharmaceuticals & detergents
- Public sector companies were set up to develop the petrochemical industry
- Plastic & fibres, petrochemical products

Liberalisation (1992-95)
- Major investment plans by both Indian firms & MNCs
- Lower tariff barriers
- Diminishing role of public sector companies
- Petrochemicals, engineering plastic, specialty fibres

Expansion (1995 onwards)
- In 2015, DCPC has announced to design a 16 point plan framework that would encourage the domestic production of chemicals
- Alliances & partnerships to achieve scale
- Licensing requirements removed except in the case of hazardous chemicals
- Increasing investments by foreign players in India through mergers & acquisition & joint ventures
- Allowed 100 per cent FDI in the chemicals Industry
- In 2016, Partnership between Indian Chemical Council (ICC) & the Tamil Nadu Pollution Control Board (TNPCB) promoted development of chemical industry by launching "Responsible Care®" programme, which aims at achieving sustainable development in chemical industry

CHARACTERISTICS OF THE INDIAN CHEMICAL INDUSTRY

- In 2015, the National Chemicals Policy of India which is expected to help in improving the chemical industry is in final stages & as a part of this, the Government is planning to launch Indian Bureau of Corrosion Control & setting up National Chemical Centre that could prevent losses from corrosion & act as a repository information center for the chemical industry.
- Strong economic growth & rise in per-capita income has meant a steady increase in demand for chemicals.
- Expected to clock a growth of 10-13 per cent over the coming years.
- The industry has left behind a low-growth and regulated environment to emerge more mature.
- There is strong government support towards R&D; this would benefit the sector.
- In 2015, Department of Chemicals & Petrochemicals added 3 new chemical & petrochemical products under its supervision.
Domestic and External Demand Driving Growth in the Sector … (1/2)

- Total chemical production in India was 9632 MT in FY15 & reached to 9884 MT in FY16. The growth of 2.61 per cent was registered from FY15 to FY16.

- Favourable demographics & strong economic growth are driving demand for chemicals.

- External demand & specialty chemicals have also contributed strongly to the growth of the industry.

- India’s growing per capita consumption & demand for agriculture-related chemicals offers huge scope of growth for the sector in the future.

Source: Department of Chemicals and Petrochemicals, TechSci Research
Note: MT - Metric Tonne
With almost 69 per cent share in the total production, alkali chemicals accounted for the largest share in Indian chemical industry in FY16. During FY16, production of alkali chemicals in India stood at 9884 MT.

In March 2017, ONGC Petro additions Ltd petrochemicals complex, located in Gujarat, became operational. Being a single largest petrochemical plant in India, it has a capacity to produce 14 lakh metric tonnes of polymers, high density polyethylene, linear low density polyethylene, polypropylene & 5 lakh metric tonnes of chemicals like pyrolysis gasoline, benzene & butadiene annually.
Chemical exports from India stood at USD 18.74 billion for FY17(1).

Exports in the chemical industry grew from USD 22.43 billion in FY13 to USD 26.97 billion in FY16, registering a growth of 4.71 per cent.
Total imports of chemicals grew from USD31.22 billion in FY13 to USD38.95 billion in FY16, a CAGR of 5.68 per cent.

Total imports of chemicals reached USD20.36 billion in the FY17(1).

Source: Ministry of Commerce, DGCI&S, TechSci Research
Notes: FY17(1) - Data is for April – October ’16
CAGR - Compound Annual Growth Rate
During FY16, organic chemicals has a share of 41.53 per cent in India’s total chemical exports, followed by miscellaneous chemicals accounts for 11.07 per cent, in overall chemical exports from India.

In agrochemicals herbicide is the largest segment globally, the consumption of insecticides in India is dominating. Growth of agro chemicals is largely driven by export demand.

Source: Ministry of Commerce, TechSci Research
Note: CAGR - Compound Annual Growth Rate
Others include Plastics and Articles thereof, Synthetic Rubber and Factice, Man-made Filaments & Man-made Staple Fibers
Organic chemicals also dominate imports, with a share of 38.94 per cent, followed by inorganic chemicals at 12.67 per cent in FY16.

Shares in imports of chemicals in FY16

- Organic: 38.94%
- Others: 12.67%
- Miscellaneous Chemicals: 10.39%
- Dyes & Dye Stuffs: 4.00%
- Inorganic: 34.00%

Source: Ministry of Commerce, TechSci Research
Note: CAGR - Compound Annual Growth Rate
Others include Plastics and Articles thereof, Synthetic Rubber and Factice, Man-made Filaments & Man-made Staple Fibers
CHEMICAL INDUSTRY HOLDS A SIGNIFICANT POSITION IN THE ECONOMY

- CHEMICALS

- India’s chemical industry (2013-16)

- 2.11 per cent of national GDP

- 3rd largest chemical industry in Asia, preceded by China & Japan

- Government allows 100 per cent FDI in the chemical sector

- 10.6 per cent of total exports & 10.5 per cent of total imports in FY16

- In 2025, chemical industry is expected to grow & reach USD403 billion Mark from USD139 billion in 2016

- One of the most diversified sectors, covering more than 70,000 commercial products

Source: FICCI, TechSci Research
Notes: Figures mentioned above is taken from Dept. of Chemicals and Petrochemicals; FY16(1) - (April- December 2015)
HIGH GROWTH WOULD LEAD TO RISING GLOBAL POSITIONING

**2015**
- Global chemical industry: USD3.26 trillion
- India chemical industry: USD144 billion

**2017E**
- Global chemical industry: USD4.5 trillion
- India chemical industry: USD224 billion

Contribution to global chemical industry would increase

- **2015**
  - Global: 96.54%
  - India: 3.46%

- **2017E**
  - Global: 95.02%
  - India: 4.98%

**Strong growth outlook for the Indian chemicals industry (USD billion)**

- **2013**: 118
- **2015**: 144
- **2017E**: 224

- French specialty chemicals major, Arkema, plans to invest USD 15 million for setting up a new polyester powder resin manufacturing facility, the 1st of its kind in India.
- As of October 2016, industrial chemicals manufacturer, Thirumalai Chemicals Ltd., plans to enhance its production capacity of phthalic anhydride & fine chemicals in India.
- The investment expo in the Odisha, organised on 2nd December, 2016, ended with investment promises worth USD 29.87 billion & 1.4 lakh jobs for the state in 10 sectors, including chemicals.
- German based, BASF, plans to setup its 1st manufacturing plant in Myanmar in 2017, to meet the growing demand for construction chemicals. The new plant will be designed specifically to manufacture customised construction chemical solutions for the local building market.
- KBR, a US based firm, secured a deal to modernize Mangalore Chemical & Fertilizers ammonia plant in Panambur, Mangalore, to improve energy efficiency of the plant, by providing its new ammonia technology.
- In March 2017, Dow Chemical plans to increase its polyurethane system production facility located in Maharashtra by 50 per cent, to expand its manufacturing base in India. The company plans to invest in a new technology center in Mumbai to improve product quality & strengthen its customer base.
- In May 2017, Resil Chemicals, a manufacturer of industrial chemical, plans to expand in international markets in a phased manner. The company has full-fledged sales operation in Bangladesh & has ventured into Sri Lanka, Turkey, Philippines, U.K. & Thailand as well.

GROWTH DRIVERS OF THE INDIAN CHEMICAL INDUSTRY

- Huge growth potential for the domestic market
- Rise in GDP and purchasing power
- World class engineering and strong R&D capabilities
- Big infrastructural investment
- Low-cost manufacturing
- Government policy support and increase in investment initiatives

Source: TechSci Research
Being largely an intermediate product, strong economic growth is an important factor in sustaining demand for chemical products.

Per capita consumption of most of the finished products under chemicals sector is far below the world average; this points to the vast potential for growth in the industry.

As in a number of other industries in India, strong growth in discretionary income and changing lifestyles are counted as a few of the other major growth drivers of the chemicals sector.

**Real GDP growth**

- FY06: 9.3%
- FY07: 9.8%
- FY08: 3.9%
- FY09: 8.5%

1. Forecast
FDI inflow in chemicals sector (other than fertilisers) stood at USD12.683 million during April 2000-December 2016, accounting 4 per cent of the total inflows. Procedures relating to FDI have been simplified; most of the items in the chemicals sector fall under the automatic approval route for FDI/NRI/OCB investment up to 100 per cent.

In March 2017, H.B Fuller has opened a new office in Pune & a new R&D center at its manufacturing facility in Shirwal, concluding the 1st phase of US$20 million planned investment in India. The plant has a capacity of 24,000 metric tonnes per annum. The company’s expansion would help to increase their footprint in India in industrial adhesives field.

In April 2017, Berger Paints India signed an MoU with Chugoku Marine Paints, a Japan-based company, to strengthen the cooperation & collaboration in the field of marine & related industrial paints. The companies plan to establish a JV company for joint efforts in marketing, supply, purchasing marine related industrial paints.

**Source:** Department of Chemicals and Petrochemicals, TechSci Research

**Note:**\(^{(1)}\) - As on December 31, 2015,
\(^{(2)}\) – Budget Estimate

For updated information, please visit [www.ibef.org](http://www.ibef.org)
The government has announced a number of measures to improve competitiveness in the sector

Share of manufacturing approved by the Cabinet as per the erstwhile Planning Commission would contribute 25 per cent of the GDP by 2025

Approval is granted for FDI up to 100 per cent in the chemicals sector, excise duty reduced from 14 per cent to 10 per cent, strong laws on anti-dumping to further promote the industry

Cumulative FDI inflows into chemical industry reached USD12,683.24 million during April 2000-December 2016

Policies are being initiated to set up Integrated Petroleum, Chemicals & Petrochemicals Investment Regions are revised by end of 2015-2016. The land requirement would go down from 250 sq. kms. to 50 sq. kms.

The capital & technology intensive projects under PCPIR that are likely to be operational within 10-15 years are estimated to draw an investment of USD116.54 billion.

For setting up of PCPIRs, the government approved states including Odisha, Gujarat, Tamil Nadu & Andhra Pradesh.

In May 2017, the U.S. has approved the sale of USD75 million worth high-tech chemical protective clothing for the Indian armed soldiers.

Industry-level initiatives

- The Indian Chemical Council (ICC) is the nodal agency/signatory representing India under the ‘Responsible Care Initiative’

- ICC has prepared codes and guidance for implementation of process safety, employee health & safety, pollution prevention, emergency response & product safety

- Member companies of ICC are encouraged to interact with local communities and groups such as students, teachers, fire/police personnel

Firm-level initiatives

- Indian chemical firms have strived to increase their market share through global presence

- They have in place technical agreements with multinational firms to keep abreast of technological progress in the global chemical industry

**SPECIALTY CHEMICALS: LUCRATIVE OPPORTUNITIES IN THIS SEGMENT**

- Specialty chemicals market has expanded at a CAGR of about 12 per cent over FY07–11; the figure is expected to rise by 9.43 per cent from FY14 to reach USD90 billion by FY23, India is also gaining traction as an outsourcing hub.
- The Indian middle-class household is expected to grow from 31 million in 2008 to 148 million by 2030, leading to a huge demand for specialty chemicals in automotives, water treatment & construction.
- Compared to developed markets, current usage of specialty chemicals in India is very low, with an increased focus on improving products & usage intensity of specialty chemicals, the industry is expected to grow.

E: Estimated Value
Within Specialty Chemicals, Construction Chemicals is Likely to Shine

- India’s construction chemical market stood at USD573.2 million in 2014, which grew to USD649.75 million in 2015.
- With the construction sector expected to pace ahead due to strong economic growth, the fundamentals for construction chemicals are sound.
- By 2019, the construction chemicals sector is set to touch USD1146.4 million.
- India’s construction chemical sector consists of a variety of products ranging from admixtures to sealants. Admixtures form the largest segment with a 42 per cent share, followed by 18 per cent share of adhesives & sealants.

Note: E-Estimate
**CHEMICALS**

**KEY GROWTH DRIVERS OF SPECIALTY CHEMICALS**

**Water treatment** chemicals are widely used in purification of water & also in large power plants, refineries & fertiliser factories.

**Automotive sector** in India has been expanding at a CAGR of ~12 per cent over the last 5 years. Automotive sector growth will drive demand for automotive components & consequently for plastics, paints & coatings used in their production.

The polymer industry will receive a boost from the proposed additional strategic crude oil reserves. Also, the proposed reduction in basic customs duty on LNG from 5 to 2.5 percent is a good provision for the petrochemicals sector. The focus on ‘Housing for All’ scheme is prominent as the target of providing 1 crore houses with a budget of US$ 4.02 billion, would give a push to the chemicals sector.

Source: TechSci Research
Polymer chemicals

- India is currently the world’s 3rd largest consumer of polymers, behind China & US, India’s polymer consumption is 6.2 million tonnes which constitutes 3 percent of the global consumption.
- Per capita consumption of polymer in India is 5.2 kg whereas China’s per capita polymer consumption is 30 kg.
- Indian Polymer market has grown at a CAGR of 23.02 per cent over 2005-15 to USD1310 million.
- The sector is expected to grow at a higher rate due to growth in plastic demand resulting from increased usage in packaging, construction and automotive sectors.
- Due to increasing environmental concerns & cost, replacement of wood, metal and glass by plastic will also augment demand.
- Polymer production in India is around 9 million tonnes & imports stand at 2.8 million tonnes.
- In FY 16(1), polymer production in India is stood at around 3.75 million tonnes, witnessing Y-o-Y growth at a rate of 17.9 per cent, over the previous year.

**Polymer chemical growth outlook (USD million)**

- **Notes:** E - Estimates, CAGR - Compound Annual Growth Rate,
  
  (1) – As of April 15 – September 15
India is the 3rd largest producer of agrochemicals, globally & ranks 4th in terms of production of crop protection chemicals. The market in India is expected to reach to USD7.5 billion by FY19 & register exports of about 50 per cent of value of Indian crop protection industry.

Agrochemical industry in India is set to grow at a significant pace; increasing population, decreasing per capita availability of arable land & focus on increasing agricultural yield will fuel the demand for agrochemicals.

India’s per hectare agrochemical consumption is set to rise in the coming years, given the above-mentioned factors.

In 2015, India has become one of the largest exporters of agrochemicals globally.

Insecticides India Ltd, an agrochemical company launched a mobile app, to provide important updates & information about products offered by the company. Insecticides India Ltd, plans to invest USD22.9 million in the next 2 years to expand its production capacity.

Insecticides India, an agrochemical company collaborated with Japanese firm - Nihon Nohyaku Co. Ltd., to launch new generation insecticides in the market.”
