Advantage India

Large and growing youth population

- India is among the world's youngest nations, with a median age of 25 years as compared to 43 in Japan and 36 in the US. This, coupled with a large population and rapidly evolving consumer preferences, has translated into a large market opportunity for FMCG players.

Emergence of organised retail business

- Real estate development in the country, such as the construction of shopping malls and hypermarkets, are opening up new business channels for FMCG companies.

Growing urbanisation

- Indian cities are expected to add 379 million people to the consumer base for FMCG companies, as the urbanisation rate is expected to increase from the current 30 to 45 per cent in the next 40 years.

Increasing disposable income

- According to recent estimates, household income in the top 20 boom cities in India is projected to grow at 10 per cent annually over the next eight years.

Market overview

- The Indian FMCG sector, with a market size of US\$ 25 billion (2007–08 retail sales), constitutes 2.15 per cent of India’s GDP.
- The industry is poised to grow between 10 to 12 per cent annually.
- A well-established distribution network spread across six million retail outlets (including two million in 5,160 towns and four million in 627,000 villages) low penetration levels, low operating costs and intense competition between the organised and unorganised segments are key characteristics of this sector.

E*- Estimated

Market analysis ... (1/4)

Organised retail — changing industry dynamics

- The Indian retail market size is estimated at US\$ 350.2 billion and is projected to grow at 13 per cent per annum to reach US\$ 590 billion by 2011–12.
- The current share of organised retail is estimated to be 4 to 5 per cent and is expected to increase by 14 to 18 per cent by 2015.
- Organised retail has created new channels for FMCG players through diverse retail formats such as departmental stores, hypermarkets, supermarkets and specialty stores.
- With organised retailing emerging in a major way across the country, the revenues of FMCG companies are expected to surge.

Market analysis ... (2/4)

Rural market — the new growth frontier

- Rural India accounts for close to one-third of the total consumption pie. Robust consumption in the rural economy is one of the key drivers of India's sustained growth.
- FMCG companies are devising exclusive rural marketing strategies to tap the rural consumer base.

ITC's e-Choupal

- Launched in June 2000, e-Choupal, has already become the largest initiative among all Internet-based interventions in rural India.
- Currently, e-Choupal services reach out to more than four million farmers growing a range of crops — soyabean, coffee, wheat, rice, pulses and shrimp — in more than 40,000 villages through 6,500 kiosks across 10 states.

DCM Shriram's "Hariyali Kisaan"

- Each centre operates in a catchment of about 20 km.
- Centres are engaged in bridging last-mile connectivity to consumers, providing quality agri input, offering financial services and farm output services as well as other products and services such as fuels, FMCG and apparel.

Market analysis ... (3/4)

Rural market — the new growth frontier

- A large number of FMCG companies derive a significant proportion of their overall sales from outside the top few 100 towns/cities, which reflects the growing economic importance of India's rural consumer base.

Company	Category	% sales from rural markets
Hindustan Unilever Ltd	Household products	45
Dabur India Ltd	Personal products	40

Market analysis ... (4/4)

GSK has launched Asha, a low-cost variant (40 per cent lower cost) of Horlicks for rural markets only. The product is priced at US\$ 1.8 for a 500-gm pouch pack.

Recently, Nestlé launched Maggi Masala-ae-Magic and Maggi Rasile Chow priced at INR 2 and INR 4, respectively, for rural consumers with low purchasing power. Maggie Rasile Chow has been developed especially to provide a low-cost, light meal fortified with iron. Masala-ae-Magic is a taste enhancer containing iron, iodine and vitamin A. These products have been developed to address the widespread concern around micro-nutrient malnutrition in India.

Britannia launched Tiger Iron Zor for low-income groups.

Market segments

- Food products is the largest consumption category in India, accounting for nearly 21 per cent of the country's GDP.
- Some of the leading players in this segment include Britannia Industries Ltd, Dabur India Ltd, GlaxoSmithKline Consumer Healthcare India Ltd and Gujarat Cooperative Milk Marketing Federation (GCMMF).

Indian FMCG market segments

Export potential ... (1/2)

- India is recognised as a cost-effective quality manufacturing base in the world market.
- As Indian companies are going global, they are focussing more on overseas markets such as the US, the UK, the UAE, Sri Lanka, Bangladesh, Thailand, Afghanistan, South Africa and Mauritius either through exports or the establishment of their own foreign subsidiaries.
- MNCs in India have also started supporting their global supply chain requirements by serving as cost-effective sourcing bases.

Export potential ... (2/2)

Exports

- Skin care products — Arabia, Malaysia and Sri Lanka
- Oral — Europe
- Tea — Europe
- Three-in-one tea premix — Arabia
- Culinary products such as soups and jams
- Marine products
- Rice — the Gulf

Exports

- Culinary products
- Noodles
- Instant coffee
- Instant tea

Exports

- Guar Gum — the UK and the US
 - Vatika Hair Oil — the Middle East and North Africa (MENA) region.
 - Dabur Vatika Naturals styling hair cream — MENA region
- The company also has a private label business in the US and the UK.

- GCPL currently exports to 33 countries, including the UAE, Sri Lanka, Bangladesh, Thailand, Afghanistan, South Africa and Mauritius.

Key trends ... (1/4)

Consolidation

Indian FMCG companies are either increasing their focus on certain market segments or are consolidating their existing business portfolios.

Dabur India Ltd merged its wholly owned subsidiary, Dabur Foods Ltd, with itself.

Agro Tech Foods Ltd, an Indian subsidiary of global food major ConAgra, exited from its sourcing and institutional business of oil and agricultural raw-material procurement, seed buying and processing operations, food service and poultry feed ingredients.

Product Innovation

Several companies have taken to innovation by launching or customising their existing product portfolios for new consumer segments.

Emami Ltd Launched a men's fairness cream.

Nestlé India and GCMF(Amul) have launched pro-biotic products by providing active ingredients in regular consumable products such as curd/yoghurt and ice cream.

Key trends ... (2/4)

Lifestyle products

Lifestyle and premium range products are the next target product segment among Indian FMCG players.

Procter and Gamble(P&G) launched its Olay range. The company also has plans to expand its current Indian product portfolio categories from eight to 25.

Hindustan Unilever Limited

The company launched Avinace, an exquisite range of high-technology, high-performance beauty services for women.

Third-party manufacturing

Outsourcing the manufacturing or processing of certain range of products to small vendors is gaining importance among FMCG players. With such initiatives, the companies can focus on front-end marketing initiatives more effectively.

GlaxoSmithKline

GlaxoSmithKline Consumer Healthcare Ltd outsources the processing of products such as malt-based foods, biscuits and nutrition bar sweetmeats to third-party vendors.

Hindustan Unilever Limited

Hindustan Unilever Ltd outsources the processing of its products such as soaps, synthetic detergents and packaged tea to third-party vendors.

Key trends ... (3/4)

Expanding horizons

Several Indian companies are exploring the business potential of overseas markets and under-penetrated regional markets.

Tata Tea acquired a 30 per cent stake in US-based Energy Brands Inc, a specialty water company.

Emami India Ltd is setting up a manufacturing facility in Africa.

Backward integration

Backward integration is becoming the preferred strategy for increasing profit margins.

KS Oils' acquisition of 53,000 acres of land for palm oil plantations in Indonesia complements its front-end strategy of establishing a refinery in East India to reinforce market leadership in the eastern and other regions of the country.

Key trends ... (4/4)

Reducing carbon footprint

- FMCG players in India are focussed on reducing their carbon foot print.
- Of the energy used in PepsiCo India's beverage business, 38 per cent comes from renewable resources.
- Dabur has 30 per cent of its steam generation fired by renewable resources.
- Hindustan Unilever Limited and ITC have earned Voluntary Emission Reduction (VER) and Certified Emission Reduction (CER) credits for their work, respectively. HUL was awarded 52,000 VER credits for developing a new soap-making process called Plough Share Mixer, which eliminates the need for steam altogether.

Policy and regulatory framework

- Automatic investment approval (including foreign technology agreements within specified norms), up to 100 per cent foreign equity, or 100 per cent for NRI and overseas corporate bodies (OCBs) investment, is allowed in food processing segments such as coffee and tea.
- The Government of India (GoI) recognises food processing and agro industries as priority sectors.
- Industrial license is not required for almost all food and agro processing industries, barring certain items such as beer, potable alcohol and wines, cane sugar and hydrogenated animal fats and oils and items reserved for exclusive manufacture in the small-scale sector.
- The GoI's announcement of a 4 per cent reduction in excise duty (as part of the earlier stimulus package in December 2008) has impacted the FMCG industry positively.
- In October 2009, the GoI amended the Sugarcane Control Order, 1966, and replaced the Statutory Minimum Price (SMP) of sugarcane with Fair and Remunerative Price (FRP) and the State Advised Price (SAP).

India is set to implement Goods and Services Tax (GST) by April 1, 2011. This move is expected to stimulate growth in the Indian FMCG industry.

- ❖ Investments
- ❖ Policy and regulatory framework
- ❖ **Opportunities**
- ❖ Industry associations

Opportunities

- With fast-evolving lifestyles and the increasing disposable income of urban consumers, there exists a definite opportunity for lifestyle and high-end products.
- With more than 33 per cent of the Indian consumer base present in rural areas, the rural market will be a key growth driver for FMCG majors planning to expand their domestic business.
- Indian consumers are highly adaptable to new and innovative products. For instance, the market acceptance of men's fairness creams clearly demonstrates an opportunity for companies to offer new products targeting specific customer segments.
- Indian and multinational FMCG players can leverage India as a strategic sourcing hub for cost-competitive product development and manufacturing for their international markets.
