HEALTHCARE
## EXECUTIVE SUMMARY

### Fourth largest employer
- India is expected to rank amongst the top three healthcare markets in terms of incremental growth by 2020.
- In FY19, Indian healthcare sector stood as the fourth largest employer as it employed a total of 319,780 people. The sector is expected to generate 40 million jobs in India by 2020.
- The Asian Research and Training Institute for Skill Transfer (ARTIST) announced plans to create around one million skilled healthcare providers by 2022.

### Impressive growth prospects
- Indian healthcare sector is expected to record a three-fold rise, growing at a CAGR of 22 per cent during 2016-2022 to reach US$ 372 billion in 2022 from US$ 110 billion in 2016.
- India ranks 145th among 195 countries in terms of quality and accessibility of healthcare. For India, HAQ index increased from 24.7 in 1990 to 41.2 in 2016. There is immense scope for enhancing healthcare services penetration in India, thus presenting ample opportunity for development of the healthcare industry.
- According to Sample Registration System Bulletin 2016, India has registered a 26.9 per cent reduction in Maternal Mortality Ratio (MMR) since 2013.

### Strong fundamentals and cost advantage
- Rising income levels, ageing population, growing health awareness and changing attitude towards preventive healthcare is expected to boost healthcare services demand in future.
- The low cost of medical services has resulted in a rise in the country’s medical tourism, attracting patients from across the world. Moreover, India has emerged as a hub for R&D activities for international players due to its relatively low cost of clinical research.

### Favourable investment environment
- Conducive policies for encouraging FDI, tax benefits, and favourable Government policies coupled with promising growth prospects have helped the industry attract private equity (PE), venture capitals (VCs) and foreign players.

ADVANTAGE INDIA
Rising income, greater health awareness, lifestyle diseases and increasing access to insurance will contribute to growth.

It is estimated that India will require 2.07 million more doctors by 2030 in order to achieve a doctor-to-population ratio of 1:1,000.

Investment in healthcare infrastructure is set to rise, benefiting both ‘hard’ (hospitals) and ‘soft’ (R&D, education) infrastructure.

The Government of India aims to increase healthcare spending to three percent of the Gross Domestic Product (GDP) by 2022.

Availability of a large pool of well-trained medical professionals in the country.

The number of doctors with recognised medical qualifications (under I.M.C Act) registered with state medical councils/medical council of India increased to 1,154,686 in 2018 from 827,006 in 2010.

The Government aims to develop India as a global healthcare hub.

Creation of new drug testing laboratories and further strengthening of the 31 existing state laboratories.

The world’s largest Government funded healthcare scheme, Ayushman Bharat, was launched on September 23, 2018.

Note: R&D – Research and Development
MARKET OVERVIEW AND TRENDS
THE HEALTHCARE MARKET FUNCTIONS THROUGH FIVE SEGMENTS

Hospitals
- Government hospitals – It includes healthcare centres, district hospitals and general hospitals.
- Private hospitals – It includes nursing homes and mid-tier and top-tier private hospitals.

Pharmaceutical
- It includes manufacturing, extraction, processing, purification and packaging of chemical materials for use as medications for humans or animals.

Diagnostics
- It comprises businesses and laboratories that offer analytical or diagnostic services, including body fluid analysis.

Medical equipment and supplies
- It includes establishments primarily manufacturing medical equipment and supplies, e.g. surgical, dental, orthopaedic, ophthalmologic, laboratory instruments, etc.

Medical insurance
- It includes health insurance and medical reimbursement facility, covering an individual’s hospitalisation expenses incurred due to sickness.

Telemedicine
- Telemedicine has enormous potential in meeting the challenges of healthcare delivery to rural and remote areas besides several other applications in education, training and management in health sector.

Source: Hospital Market – India by Research on India
STRONG GROWTH IN HEALTHCARE EXPENDITURE OVER THE YEARS

- Healthcare has become one of India’s largest sector, both in terms of revenue and employment. The industry is growing at a tremendous pace owing to its strengthening coverage, service and increasing expenditure by public as well private players.
- During 2016-22, the market is expected to record a CAGR of 17.69 per cent.
- The total industry size is estimated to touch US$ 372 billion by 2022.

**Note:** F – Forecast  
**Source:** Frost and Sullivan, LSI Financial Services, Deloitte
PER CAPITA HEALTHCARE EXPENDITURE HAS RISEN AT A FAST PACE

- This is due to rising income, easier access to high-quality healthcare facilities and greater awareness of personal health and hygiene.
- Greater penetration of health insurance aided the rise in healthcare spending, a trend likely to intensify in the coming decade.
- Economic prosperity is driving the improvement in affordability for generic drugs in the market.
- The Government’s expenditure on healthcare sector grew 1.6 per cent of Gross Domestic Product (GDP) in FY20BE from 1.3 per cent of GDP in FY16.
- The Government is planning to increase public health spending to 2.5 per cent of the country’s GDP by 2025.
- The share of healthcare in GDP is expected to rise 19.7 per cent by 2027.

Note: BE- Budget Estimated, RE- Revised Estimate

NOTABLE TRENDS AND STRATEGIES ADOPTED
India's medical educational infrastructure has grown rapidly in the last 26 years.

The number medical colleges in India increased to 529 in FY19 from 412 in FY16.

The number of doctors having recognised medical qualifications (under I.M.C Act) registered with state medical councils/medical council of India increased to 1,154,686 in 2018 from 827,006 in 2010.

According to a study in India, there is only one Government doctor for every 10,189 people and there is a deficit of 600,000 doctors, whereas, the nurse to patient ratio is 1:483.

Source: National Health Profile 2018
| Shift from communicable to lifestyle diseases | ▪ With increasing urbanisation and problems related to modern-day living in urban settings, currently, about 50 per cent of spending on in-patient beds is for lifestyle diseases – this has increased the demand for specialised care. In India, lifestyle diseases have replaced traditional health problems.  
▪ Most lifestyle diseases are caused by high cholesterol, high blood pressure, obesity, poor diet and alcohol. |
| Expansion to tier II and tier III cities | ▪ Vaatsalya Healthcare is one of the first hospital chains to start focus on tier II and tier III for expansion.  
▪ To encourage the private sector to establish hospitals in these cities, the Government has relaxed taxes on these hospitals for the first five years. |
| Emergence of telemedicine | ▪ Telemedicine is a fast-emerging sector in India. Major hospitals (Apollo, AIIMS, Narayana Hrudayalaya) have adopted telemedicine services and entered into a number of PPPs.  
▪ Telemedicine market in India is expected to rise at a CAGR of 20 per cent during FY16-20, reaching US$ 32 million by 2020.  
▪ Telemedicine can bridge the rural-urban divide in terms of medical facilities, extending low-cost consultation and diagnosis facilities to the remotest of areas via high-speed internet and telecommunication. |
| Artificial Intelligence (AI) | ▪ Rising adoption of AI-based applications has enabled people to talk directly to doctors, physician, and expertise for the best treatment.  
▪ It is also capable of solving problems of patients, doctors, and hospitals as well as the overall healthcare industry. |
| Home healthcare | ▪ Development in information technology (IT) and integration with medical electronics has made it possible to provide high quality medical care at home at affordable prices. It enables the customers to save up to 20-50 per cent of the cost.  
▪ The home healthcare market is estimated to reach US$ 6.21 billion by 2020 from US$ 4.46 billion at the end of 2018. |

Note: PPP is Public – Private Partnerships, Management contracts - An arrangement under which operational control of an enterprise is given to a separate entity for a fee
Source: IRDA, CII, Grant Thornton, Gartner, Technopak
NOTABLE TRENDS IN THE INDIAN HEALTHCARE SECTOR … (2/2)

| Increasing penetration of health insurance | • In FY20, gross healthcare insurance stood at 27.3 per cent of overall gross direct premium income by non-life insurers segment.  
• Health insurance is gaining momentum in India. Gross direct premium income underwritten by health insurance grew 17.16 per cent y-o-y to Rs 51,637.84 crore (US$ 7.39 billion) in FY20. |
| Mobile-based health delivery | • Strong mobile technology infrastructure and launch of 4G is expected to drive mobile health initiatives in the country.  
• In April 2020, first COVID-19 sample collection mobile lab of the country, namely ‘Mobile BSL-3 VRDL Lab’, was launched that can process more than 1,000 samples in a day and enhance country’s capabilities in fighting COVID-19. |
| Technological initiatives | • Digital Health Knowledge Resources, Electronic Medical Record, Mobile Healthcare, Electronic Health Record, Hospital Information System, PRACTO, Technology-enabled care, telemedicine and Hospital Management Information Systems are some of the technologies gaining wide acceptance in the sector.  
• In June 2020, Government launched COVID BEEP (Continuous Oxygenation and Vital Information Detection Biomed ECIL ESIC Pod), India’s first indigenous and cost effective wireless physiological parameters monitoring system for COVID-19 patients, developed by ESIC Medical College Hyderabad in collaboration with IIT Hyderabad and Department of Atomic Energy.  
• In June 2020, VST Mobility Solutions, a start-up headquartered at Cochin, launched an automated mask disposal machine as part of its effort to develop products to combat COVID-19. |
| Luxury offering | • A new trend is emerging as luxury offerings in the healthcare sector. More than essential requirements, healthcare providers are making offerings of luxurious services. For example, pick and drop services for patient by private helicopters and luxurious arrangements for visitors to patient in hospital. |

Source: Business Standard, Ministry of External Affairs, Ministry of External Affairs (Investment and Technology Promotion Division)
## STRATEGIES ADOPTED

| Cost leadership | Private players in the industry are making their supply chains efficient and leveraging economies of scope to reduce cost. One such example is Narayan Hrudayalaya (NH), where health care is provided at affordable cost. NH reduces cost by high procurement of medical supplies, high-volume by high capacity utilisation and staff productivity and good human capital management (i.e. training). |

| Differentiation and diversified business approach | Players in the industry are trying to differentiate themselves by providing multiple health care services under one roof.  
Offering a range of healthcare and wellness services under a single brand has become a trend. Patients and healthcare services seekers find it convenient. Demand of such arrangements boosts the healthcare sector. |

| Focus | Certain players in the industry focus only on providing one kind of healthcare service to its customers. This also helps them to be the leader in that service. Many examples can be quoted for hospitals focusing on treatment of cancer and providing leading cancer treatment and eye related problems and treatments in India. |

| Merger & Acquisition (M&A) | The value of M&A deals in hospital sector jumped by record 155 percent to Rs 7,615 crore (US$ 1.09 billion) in FY19.  
In May 2020, Jubilant Generics Ltd entered into a non-exclusive licencing agreement with US-based Gilead Sciences Inc to manufacture and sell the potential COVID-19 drug Remdesivir in 127 countries, including India.  
In May 2020, Carlyle Group acquired 74 per cent stake in animal health focused pharmaceutical company, SeQuent Scientific Ltd, for about Rs 1,580 crore (US$ 224.15 million).  
In June 2020, DocsApp, online doctor consultation app, announced a merger with Bengaluru-based healthcare platform, MediBuddy, to expand its online health care segment. |

RISING INCOME, AGEING POPULATION TO BE KEY HEALTHCARE DEMAND DRIVER

- Rising income means a steady growth in the ability to access healthcare and related services.
- Per capita GDP of India is expected to reach US$ 3,277.28 in 2024 from US$ 1,761.63 in 2016.
- Moreover, changing demographics will also contribute to greater healthcare spending. This is likely to continue as the size of elderly population is set to rise from the current 98.9 million to about 168 million by 2026.

Source: International Monetary Fund, World Economic Outlook Database, April 2018
MEDICAL TOURISM: A NEW GROWTH FACTOR FOR INDIA’S HEALTHCARE SECTOR

- Presence of world-class hospitals and skilled medical professionals has strengthened India’s position as a preferred destination for medical tourism.
- Superior quality healthcare coupled with low treatment costs in comparison to other countries is benefiting Indian medical tourism, and in turn, has enhanced prospects for the Indian healthcare market.
- Treatment for major surgeries in India costs approximately 20 per cent of that in developed countries.
- India also attracts medical tourists from developing nations due to lack of advanced medical facilities in many of these countries.
- Indian medical tourism market is growing at the rate of 18 per cent y-o-y and is expected to reach US$ 9 billion by 2020.
- Yoga, meditation, ayurveda, allopathy and other traditional methods of treatment are major service offerings that attract medical tourists from European nations and the Middle East to India.
- Government of India has been implementing various initiatives to promote Ayurveda, Yoga & Naturopathy, Unani, Siddha and Homeopathy (AYUSH) systems of medicine on an international level and has allocated Rs 2,122 crore (US$ 303.62 million) in Union Budget 2020-21 for this purpose.
- The Government of India liberalised its policy by providing 100 per cent FDI in the AYUSH sector for wellness and medical tourism segment.
- In February 2019, the Government established new All India Institute of Medical Sciences (AIIMS) at Manethi, District Rewari, Haryana at a cost of Rs 1,299 crore (US$ 180.04 million).

### Pradhan Mantri Jan Arogya Yojana (PMJAY)

- As of July 2019, around 125.7 million families were enrolled as beneficiaries under Pradhan Mantri Jan Arogya Yojana (PMJAY). The scheme enrolled 16,085 hospitals, including 8,059 private hospitals and 7,980 public hospitals.
- The Government has announced Rs 69,000 crore (US$ 9.87 billion) outlay for the healthcare sector that is inclusive of Rs 6,400 crore (US$ 915.72 million) for PMJAY in Union Budget 2020-21.

### Tax incentives

- All healthcare education and training services are exempted from service tax.
- Increase in tax holiday under section 80-IB for private healthcare providers in non-metros for minimum of 50 bedded hospitals.
- 250 per cent deduction for approved expenditure incurred on operating technology enables healthcare services such as telemedicine, remote radiology. Artificial heart is exempted from basic custom duty of 5 per cent.
- Income tax exemption for 15 years for domestically manufactured medical technology products.
- The benefit of section 80-IB has been extended to new hospitals with 100 beds or more that are set up in rural areas. Such hospitals are entitled to 100 per cent deduction on profits for 5 years.

### National Nutrition Mission

- The Union Cabinet approved setting up of National Nutrition Mission (NNM) to monitor, supervise, fix targets and guide the nutrition related interventions across ministries.
- The programme is planning to reduce the level of stunting by 2 per cent, under-nutrition 2 per cent, anaemia by 3 per cent and low birth babies by 2 per cent every year.
- Over 100 million people are expected to be benefited by this programme – all states and districts will be covered within the programme.
- In Union Budget 2020-21, Rs 35,600 crore (US$ 5.09 billion) has been allocated for nutrition-related programmes.

100 per cent FDI is allowed under the automatic route for greenfield projects.

For brownfield project investments, up to 100 per cent FDI is permitted under the Government route.

Demand growth, cost advantages and policy support have been instrumental in attracting FDI.

During April 2000–March 2020, FDI inflow for drugs and pharmaceuticals sector stood at US$ 16.50 billion.

Inflow into sectors such as hospitals and diagnostic center and medical appliances stood at US$ 6.73 billion and US$ 2.12 billion, respectively, during the April 2000–March 2020.

Note: FDI – Foreign Direct Investment

## OPPORTUNITIES IN HEALTHCARE

### Healthcare infrastructure
- Additional three million beds will be needed for India to achieve the target of 3 beds per 1,000 people by 2025.
- Additional 1.54 million doctors and 2.4 million nurses will be required to meet the growing demand for healthcare. 58,000 job opportunities are expected to be generated in the healthcare sector by 2025.
- Over US$ 200 billion is expected to be spent on medical infrastructure by 2024.
- Over the years, India has made strategic interventions in National Health Mission and the national disease control programmes to ensure quality and affordable healthcare for all.

### Research
- Contract research is a fast-growing segment in the Indian healthcare industry.
- Cost of developing new drugs is as low as 60 per cent of the testing cost in the US.
- To promote the research in traditional system of medicine in Himalayan region, Central Council for Research in Ayurvedic Sciences (CCRAS) established nine institutes in Jammu & Kashmir, Ladakh, Himachal Pradesh, Uttarakhand, Assam, Arunachal Pradesh, Sikkim, Tripura and Nagaland.

### Medical tourism
- In 2018-19, the medical tourism market is expected to double due to the easier norms for medical visa approvals. The value of medical tourism is forecasted to reach US$ 9 billion by 2020.
- Cost of surgery in India is nearly one-tenth of the cost in developed countries.
- There are 21 Joint Commission International (JCI) accredited hospitals in India and growing.

### Medical devices
- The medical devices market is expected to reach US$ 11 billion by 2022, backed by rising geriatric population, growth in medical tourism and declining cost of medical services.

*Source: News articles*
OPPORTUNITIES IN HEALTH INSURANCE

- Increasing healthcare cost and burden of new diseases along with low Government funding is raising demand for health insurance coverage.
- Many companies offer health insurance coverage to employees, driving market penetration of insurance players.
- With increasing demand for affordable and quality healthcare, penetration of health insurance is poised to grow exponentially in the coming years.
- In FY20, total gross direct premiums grew at 13.40 per cent y-o-y to Rs 51,637.84 crore (US$ 7.39 billion). The health segment has a 27.3 per cent share in gross direct premiums earned in the country.
