Executive summary

1. Coal production
   - Coal production in the country stood at 730.87 million tonnes (MT) in FY20 and reached 545.46 MT in FY21 (as of January 2021).

2. Fourth largest iron ore producer
   India ranks fourth globally in terms of iron ore production. Production of iron ore in FY20 stood at 205.74 MT.

3. Steel production
   In FY20, India had a total number of 914 steel plants producing crude steel. In January 2021, India’s crude steel production increased by 7.4% YoY to reach 10 million tonnes (MT), as per the World Steel Association (worldsteel).

4. Aluminium production
   Combined Aluminium production (primary and secondary) in India stood at 3.6 MT in FY20.

5. Long duration mining lease
   India has a vast mineral potential with mining leases granted for a longer duration of 50 years.
Advantage India
Advantage India

2. DEMAND GROWTH

- Rise in infrastructure development is driving growth.
- Power and cement industries also aiding growth in the metals and mining sector.
- Demand for iron and steel is set to continue, given the strong growth expectations for the residential and commercial building industry.

3. ATTRACTION OPPORTUNITIES

- In February 2021, under the Production-Linked Incentive (PLI) scheme, the government approved an outlay of funds worth Rs. 6.322 crore (US$ 864.67 million) over five years to boost the domestic production of specialty steel.
- The Geological Survey of India has nearly doubled its exploration activity by implementing about 400 mineral exploration projects on various mineral commodities. In January 2021, GSI launched the National Geoscience Data Repository (NGDR) to collate the country's geoscience data to derive high-quality baseline data in order to boost mineral exploration.

4. POLICY SUPPORT

- In Union Budget 2021, the government reduced customs duty to 7.5% on semis, flat and long products of non-alloy, alloy and stainless steels to provide relief to MSMEs.
- To boost recycling of copper in India, the government announced reduction of import duty on copper scrap from 5% to 2.5% in the Union Budget 2021.

1. COMPETITIVE ADVANTAGE

- India holds a fair advantage in cost of production and conversion costs in steel and alumina.
- As of FY20, India had 1,356 active mines and produces 95 minerals – 4 fuel-related minerals, 10 metallic minerals, 23 non-metallic minerals, 3 atomic minerals and 55 minor minerals (including building and other minerals).
Market Overview
1. 1947
- Mining sector received a boost post independence under the impact of successive 5 Year Plans.

2. 1956
- The exploration of minerals was intensified, and the Geological Survey of India was strengthened.
- Indian Bureau of Mines was established to look after the scientific development of mineral resources.

3. 1972
- Mineral Exploration Corporation established to conduct exploration with focus on coal, iron ore, limestone, dolomite and manganese ore.
- Indian mining sector was opened to Foreign Direct Investment in 1993 after the announcement of the New Mineral Policy.

4. 2012
- The Mineral Exploration Corporation established to conduct exploration with focus on coal, iron ore, limestone, dolomite and manganese ore.
- Indian mining sector was opened up to Foreign Direct Investment in 1993 after the announcement of the New Mineral Policy.

5. 2014
- The Ministry of Mines notified revised royalty rates and dead rent in September 2014 and the revised rates came into effect on September 1, 2014.

6. 2018 onwards
- Total crude steel production in India reached 111.2 million tonnes in 2019 making the country the second-largest crude steel producer in the world.
- In May 2020, the Government of India announced major reforms in mining of minerals through seamless composite exploration-cum-production regime. Also, >500 blocks of minerals will be auctioned in a composite exploration-cum-mining-cum-production regime.
## Segments of metals and mining industry

<table>
<thead>
<tr>
<th>Segment</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Iron and steel</strong></td>
<td>Iron and steel segment offers a product mix which includes hot rolled parallel flange beams and columns rails, plates, coils, wire rods and continuously cast products such as billets, blooms, beam, blank, rounds and slab and metallics and ferro alloy.</td>
</tr>
<tr>
<td><strong>Coal</strong></td>
<td>Coal market consists of primary coal (anthracite, bituminous and lignite).</td>
</tr>
<tr>
<td><strong>Aluminium</strong></td>
<td>Aluminium segment includes primary aluminium, aluminium extrusions, aluminium rolled products, alumina chemicals.</td>
</tr>
<tr>
<td><strong>Bauxite</strong></td>
<td>BauxBPM are sub-divided into two basic types based on the processing methods - Tropical bauxite and European bauxite.</td>
</tr>
<tr>
<td><strong>Base metals</strong></td>
<td>Base metal market consists of lead, zinc, copper, nickel and tin.</td>
</tr>
<tr>
<td><strong>Precious metals and minerals</strong></td>
<td>Precious metals market includes gold, silver, platinum, palladium, rhodium and diamond.</td>
</tr>
</tbody>
</table>
Strong growth in India’s metals & mining sector over the years

- GVA from mining and quarrying stood at US$ 39.72 billion in FY21, as per the second revised estimates.
- Mineral production also surged, registering a CAGR of 5.52% between FY16 and FY20E and reached US$ 17.53 billion in FY20E.
- The production of key minerals, which increased YoY in December 2020, included Limestone (10.1%) (333 lakh tonnes), Zinc conc. (8.6%) (131 thousand tonnes), Lead conc. (3.4%) (34 thousand tonnes) and Coal (2.1%) (711 lakh tonnes).
- Exports of mica, coal & other ores and minerals including processed minerals stood at US$ 2,991.13 million in FY21 (from April 2020 to January 2021).

Notes: CAGR - Compound Annual Growth Rate, *Excluding atomic and fuel minerals, GVA - Gross Value Added, P - Provisional, E - Estimate
Source: Ministry of Statistics and Programme Implementation, Ministry of Mines
Production of as many as 95 minerals is undertaken in India, including 4 fuel minerals, 10 metallic minerals, 23 non-metallic minerals, 3 atomic minerals and 55 minor minerals (including building and other materials).

Odisha was the leading producer of minerals with production worth US$ 4.38 billion in FY20E, followed by Rajasthan, Karnataka, Andhra Pradesh and Chhattisgarh with production worth US$ 2.98 billion, US$ 1.57 billion, US$ 1.40 billion and US$ 1.40 billion, respectively.

Production of metallic minerals in the country increased from US$ 5.14 billion in FY16 to US$ 9.29 billion in FY20E. During the same period, production of non-metallic minerals increased from US$ 1.16 billion to US$ 1.34 billion.

Iron ore is a key input for production of steel and primary iron.

Majority (over 85%) of iron ore reserves are of medium- to high-grade and are directly used in blast furnace and direct reduced iron (DRI) plants in the form of sized lumps or sinters or pellets.

India was estimated to be the fourth-largest producer of iron ore in 2019.

Iron ore production in the country stood at 112 million tonnes in FY21 (up to November 2020).

To increase availability of iron ore in India, the government took several initiatives, such as ‘Mining and Mineral Policy’ reforms, to ramp up production and maximum capacity utilisation by government mining companies. For example, SAIL, with the approval to sell 25% fresh fines and 70 MT dumps and tailings, accelerated sale of iron ore.

Notes: CAGR- Compounded Annual Growth Rate, P - Provisional, E - Estimate

Rising steel demand driving growth

- India’s crude steel production stood at 82.71 million tonnes in FY21 (between April 2020 and January 2021).
- Crude steel demand/production is forecast to reach 255 million tonnes by FY31.
- The National Steel Policy aims to boost per capita steel consumption to 160 kgs by 2030-31. The government has a fixed objective of increasing rural consumption of steel from the current 19.6 kgs per capita to 38 kgs per capita by 2030-31.
- On October 1, 2020, Directorate General of Foreign Trade (DGFT) announced that steel manufacturers in the country can avail duty drawback benefits on steel supplied through their service centres, distributors, dealers and stock yards.

Notes: CAGR - Compound Annual Growth Rate, MT - Million Tonnes, * - Until January 2021

Rising domestic demand puts pressure on supply of iron and steel… (1/2)

- In FY20, India’s iron and steel export was valued at US$ 9.28 billion. During FY16-FY20, India’s export of iron and steel grew at a CAGR of 14%.
- Government of India has imposed 30% export duty on all iron ore forms (except the low-grade iron ore) and 5% export duty is levied on iron ore pellets.
- In June 2020, iron and steel recorded more than 100% growth in exports shipments of US$ 1.32 billion against US$ 653.52 million in June 2019.

India has turned into a net importer of iron and steel due to strong growth in the manufacturing sector and rising infrastructure projects.

India’s transition into a net importer of steel despite the strong growth in domestic steel production shows the demand potential of the sector.

The impact of strong growth in domestic steel production has been most felt in the iron ore sector. With steel firms’ ever rising demand for the raw material, India’s import of iron ore has been growing steadily.

Iron and steel imports stood at US$ 9,482.29 million in FY21 (from April 2020 to January 2021).

In November 2020, MS Agarwal Foundries (MSAF) announced plan to set up a steel plant in Andhra Pradesh. The company signed an MoU with the Government of Andhra Pradesh for commissioning a new ultramodern steel plant at Mantralayam in Kurnool district. The plant will require an investment of Rs. 1,200 crore (US$ 162.40 million) and be completed by the second half of 2021.

In March 2020, IMR Metallurgical Resources AG, a Switzerland-based company, has proposed to set up a major steel plant in YSR Kadapa district, Andhra Pradesh, with an annual production capacity of 10 million tonnes by investing more than Rs. 12,000 crore (US$ 1,630.89 million)

Coal production growing at a steady pace

- In the coming years, coal production in the country is likely to receive a boost as the Government plans to replace country’s captive mining policy in coal and iron ore with an open bidding one.
- India’s coal production stood at 545.46 million tonnes in FY21*.
- In September 2020, Coal India Ltd. (CIL) announced plans to invest over Rs. 1.22 lakh crore (US$ 16.5 billion) on projects related to coal evacuation, exploration and clean coal technologies by 2023-24 to achieve 1 billion tonnes of the fuel output target.
- In November 2020, the Union Coal Minister, Mr. Pralhad Joshi, stated that 19 mines have been successfully auctioned; this is the highest number of successfully auctioned mines in any tranche of coal auctions. The country’s first-ever commercial mining auction will garner a total revenue of Rs. 6,656 crore (US$ 900.59 million) annually from mines spread over the following five states—Madhya Pradesh, Chhattisgarh, Odisha, Jharkhand and Maharashtra.
- In January 2021, the Ministry of Coal launched ‘Single Window Clearance Portal’, a unified platform that facilitates the grant of clearances and approvals required for starting a coal mine in India.

Growing domestic demand to support Aluminium production

- Demand for aluminium is expected to pick up as the scenario improves for user industries like power, infrastructure and transportation.
- Production of aluminium stood at 3.65 million tonnes in FY20.
- Aluminium export from the country reached 1.50 million tonnes in FY19 and 0.52 million tonnes in FY20. In value terms, aluminium export from the country stood at US$ 20.18 million in FY20.
- The National Aluminium Company (NALCO), a central government-owned entity, is set to join the club of million tonne producers in the metal segment by 2020. NALCO has readied about US$ 3.72 billion investments for increasing its alumina, aluminium and power production capacities.
  - In April 2020, the Government of Odisha granted the mining lease of Utkal-D coal block in Angul district to NALCO. The initial capacity of Utkal-D coal block is 2 million tonnes per year with a total mineable reserve of 101.68 million tonnes.
- In January 2021, the National Aluminium Company (NALCO) announced that it would invest ~Rs. 30,000 crore (US$ 4,102.51 million) by 2027-28 in capacity expansion and diversification.

**Note:** CAGR - Compound Annual Growth Rate, F- Forecast, ^CAGR is till FY20, *- Until December 2020

Recent Trends and Strategies
### Notable trends in the metals and mining sector… (1/3)

#### 1. Captive mining for coal
- In captive mining for coal, companies are permitted to set up coal washeries and for specified end uses, including the setting up of power plants, fertilizers and steel units.

#### 2. Longer duration lease
- India has seen a significant growth in minerals with the Government granting lease for longer duration, between 20-30 years.

#### 3. Focus on domestic market
- Demand for metal and metal products is rising in the domestic market, with India focusing to expand its domestic manufacturing.
- In February 2021, two new iron ore mines were inaugurated in Odisha, with a production capacity of 15 lakh tonnes per month and ~275 million tonnes of consolidated iron ore reserves. These mines will bring in ~Rs. 5000 crore (US$ 679.28 million) in annual revenue for the state and employment opportunities for locals.

#### 4. Overseas ventures
- In search of greater mineral opportunities, an increasing number of Indian mining companies are venturing overseas in a bid to secure stable, long-term supplies of minerals especially in the areas of coal and iron ore.
- Adani Enterprises’ Carmichael coal plant expects to make its first shipment by August 2021.
Outlook of metal and mining

- The index of mineral production was 132.7 in March 2020.
- Mining group under Index of Industrial Production (IIP) stood at 109.7 for FY20, showing a growth of 1.7% y-o-y.

Build strategic alliances

- Alliance with global and domestic players help companies to improve their operational performance through technological improvement and cost optimisation.

- In February 2021, Coal India signed a contract with the Centre for Railway Information Systems (CRIS) for tracking the movement of rakes laden with fossil fuel and coal despatch activity.

- In February 2021, Energy Efficiency Services Limited (EESL) and Coal India Ltd. (CIL) signed a memorandum of understanding for energy efficiency and resource management programmes to decarbonise CIL’s projects and facilities.

- In February 2021, CIL signed a contract with Belaz, a Belarus-based mining equipment manufacturer, for procurement of dumpers with an investment amount worth Rs. 2,900 crore (US$ 393.98 million).

- In February 2021, CIL also announced plans to invest Rs. 1.43 lakh crore (US$ 19.43 billion) in 20 sir projects, including solar, thermal and aluminum projects.
Notable trends in the metals and mining sector… (3/3)

Focus on technology

- Players in the industry are focusing on optimising technology to increase process efficiency.

- Coal India Ltd. has ambitious plans of using GPS/GPRS based vehicle tracking system to enhance productivity. It also has services such as E-auction and E-procurement of goods and services.

- Mining Industry in India has been dominated by surface mining. However, due to various challenges presented by surface mining, the move towards underground mining is considered inevitable. This presents an opportunity for players to enter the market with underground mining technology.

- According to Federation of Indian Mineral Industries (FIMI), digital mining will help run the mining business more effectively and sustainably across the entire value chain.

- In January 2021, the Ministry of Steel, Government of India, signed a Memorandum of Cooperation (MoC) with the Ministry of Economy, Trade and Industry, Government of Japan, to boost the steel sector through joint activities under the framework of India–Japan Steel Dialogue.

Cost optimisation

- Players in the industry are trying to minimise cost to gain competitive advantage.
  
  - For example, SAIL is trying to reduce cost by entering into an MoU for coal bed methane and propane gas to reduce cost of energy.

- Optimising input resources, operating efficiency for handling assets available with the company, reducing overhead costs and stabilising newly formed operation units.
Growth Drivers
Strong fundamentals and policy support aiding growth

**Higher demand for metals**
- Growing infrastructure investment
- Sustained growth in India’s automotive sector
- Aluminum and coal benefiting from rising power production
- Rising production of cement increasing demand for coal

**Policy support**
- Relaxed FDI norms
- Allowing private ownership
- Reduced customs duty
- Tax and other incentives

**Innovation**
- Expanding research and development and distribution facilities in India
- Use of modern technology
- Providing support to global projects from India

**Increasing investment**
- Increasing FDI
- Increasing private participation

**Notes:** M&As - Mergers and Acquisitions, FDI - Foreign Direct Investment

**Source:** TechSci Research
A fast-expanding construction sector has aided growth

- India is witnessing a sustained growth in the infrastructure build up. The construction industry has witnessed a strong growth wave powered by large spends on housing, road, ports, water supply, rail transport and airport development.
- In March 2020, NHAI accomplished the highest ever highway construction of 3,979 km of national highways in FY20.
- Revenue growth has been strong over the years. Indian Railways’ revenue reached US$ 24.78 billion in FY20.
- Cargo traffic handled stood at 707.4 million tonnes (MT) in FY20.
- Electricity production reached 1,252.61 BU in India in FY20.
- It has been estimated that India is going to require US$ 4.5 trillion of investment by 2040 for infrastructure development.
- The Government of India has allocated Rs. 111 lakh crore (US$ 1.4 trillion) under the National Infrastructure Pipeline (NIP) for FY2019-25. Sectors such as energy (24%), roads (18%), urban (17%) and railways (12%) account for ~71% of the projected infrastructure investments in the country.

Note: F - Forecasts (by BMI), CAGR - Compounded Annual Growth Rate, BU - Billion Unit
Source: Business Monitor International’s (BMI) Report on infrastructure industry in India
In FY21* (until January 2021), the installed capacity in India stood at 377.26 GW.

Installed capacity have increased steadily over the years, posting a CAGR of 7.19% in FY16-FY20.

Energy generation from conventional sources stood at 97.70 billion units (BU) in March 2020. Between 2017 and 2022, conventional sources are expected to witness capacity addition of 58.38 GW.

Around 81% of the total power generation was done through thermal power plants, while hydro and nuclear plants contributed 15% and 4% respectively in FY20.

Note: GW - Gigawatt, ^ - Tentative, @ CAGR till FY20, * - Until December 2020

Favourable policies are supporting the sector growth

1 Mineral Laws (Amendment) Bill, 2020
- Aims to open a new era in Indian coal and mining sector, specially to promote 'ease of doing business'.
- It will boost coal production and will reduce dependency on import.

2 National Mineral Policy 2019
- To bring more transparency, better regulation and enforcement, balanced socio-economic growth along with sustainable mining practices.
- Proposed to grant 'industry' status to mining with an objective of boosting financing of private sector.
- Supported M&A of mining players.

3 Relaxed FDI norms
- FDI up to 100% is permitted under the automatic route to explore and exploit all non-fuel and non-atomic minerals and process all metals as well as for metallurgy.
- FDI cap in the mining and exploration of metal and non-metal ores have been increased to 100% under the automatic route.
- In March 2018, the Government allowed 100% FDI in coal mining.

4 Allowing private ownership
- Government of India is encouraging private ownership for steel operations and other high priority industry.

5 Reduced custom duty
- Government of India significantly reduced the duty payable on finished steel products and has streamlined the associated approval process.

6 Skill Development Plan for the Mining Sector (2016-22)
- Focus on upgradation of skill sets to foster adaptation of new state of art technology.
- Increase the capacity and quality of training infrastructure and trainers to address human resource needs.

7 Bank Loans
- State Bank of India (SBI) is planning to introduce a policy to lend loans to the coal miners before the landmark auction.
- As per the planned policy, SBI is open to provide some of the financing required to put 41 coal mines with a combined annual production capacity of 225 million tonnes to private companies.
Foreign investments flowing in India

- FDI up to 100% is allowed in exploration, mining, minerals processing metallurgy and exploration of metal and non-metal ores under the automatic route for all non-fuel and non-atomic minerals including diamonds and precious stones.
- From April 2000 to September 2020, FDI inflow in the metallurgical industry stood at US$ 14,244.26 million, followed by mining (US$ 2,789.44 million), diamond and gold ornaments (US$ 1,183.07 million) and coal production (US$ 27.73 million) industries.

Opportunities

**Policy support**
- The government took the following steps to allow imports of steel at lower prices and support the domestic industry.
  - Tax on imports of iron and steel products has been exempted until March 31, 2022—it was originally 2.5% and has been reduced to nil in the Union Budget 2021.
  - Anti-dumping and distributional duties on some steel products have been temporarily suspended until September 30, 2021.

**Scope for new mining capacities in iron ore, bauxite and coal**
- India has the world’s seventh largest reserve base of bauxite and fourth largest base of iron ore, which accounts for about 7% and 11% of the total world production, respectively.
- Moreover, India had the world’s fifth largest coal reserve at 319.02 billion tonnes in FY19.

*Source: WSA, Ernst and Young*
Opportunities

3

Rapid growth of user-industries to drive demand for metals and minerals

- Strong long-term demand from the steel industry is expected to further boost the iron ore industry.
- Increasing power production is likely to catapult demand for coal.
- Booming construction, automobiles and packaging industries are expected to lend substantial support to the metals and mining sector.

4

Expansion of product line by existing players

- The iron and steel segment offers a product mix which include hot rolled parallel flange beams and columns rails, plates, coils, wire rods, and continuously cast products such as billets, blooms, beams, blanks, rounds and slabs as well as metallics and ferro alloy 
- Looking at the expected growth in the sector, existing manufacturers have a huge opportunity to expand their product line in new segments.

Source: WSA, Ernst and Young
Opportunities in the iron ore sector

1

Exploration in proposed exploration zones
- Odisha: Bonai (Keonjhar belt) and Tomka (Daitari and Umerkoke belts).
- Jharkhand: All major high-grade ore deposits; contain low-grade lateritic ores.
- Karnataka: Bagalkot, Tumkur, and Chitradurga districts.
- Maharashtra: Sindhudurg, Gadchiroli and Gondia.
- Chhattisgarh: All 14 deposits of Bailadila range, Dantewada district.
- Andhra Pradesh: Kadapa, Kurnool, Karimnagar, Adilabad, and Guntur districts.

2

Scope for new mining capacities in iron ore, bauxite and coal
- Pelletisation capacity is about 59.30 metric tonnes per annum (MTPA)*.
  - Sintering capacity is about 70.05 MTPA*.
- Scope for domestic and foreign firms to explore PPP opportunities.
  - Joint Venture or technical participation with midcap players with lease/license and seeking capital, expertise and technology.
  - Through the auction route, players can get access to coal mines and iron ore reserves.

Notes: MT - Metric Tonnes, MTPA - Metric Tonnes Per Annum, *: As per Indian Minerals Yearbook 2017
