EXECUTIVE SUMMARY

- Rising per capita income, favourable demographics and a shift in preference to branded products to boost demand
- The domestic textile and apparel industry in India is projected to reach US$ 223 billion by 2021 from US$ 137 billion in 2016.

- Favourable trade policies and superior quality to drive textile exports
- Textile and apparel exports from India is expected to increase to US$ 82 billion by 2021 from US$ 36.63 billion in FY17

- Increase in domestic demand set to boost cloth production
- Total cloth production in India stood at 53.5 billion square metres in FY17 (upto January 2017).

Notes: CAGR - Compound Annual Growth Rate, E – Estimate, P – Provisional;⁽¹⁾, up to January 2017

ADVANTAGE INDIA
ADVANTAGE INDIA

- Increased penetration of organised retail, favourable demographics and rising income levels to drive textile demand
- Growth in building and construction will continue to drive demand for non-clothing textiles

- Abundant availability of raw materials such as cotton, wool, silk and jute
- India enjoys a comparative advantage in terms of skilled manpower and in cost of production relative to major textile producers

- Huge investments are being made by Government under Scheme for Integrated Textile Parks (SITP)-(US$ 184.98 million) and Technology Upgradation Fund Scheme (TUFS)-(term loan sanctioned in Feb, 2015- US$ 2198.45 million) to encourage more private equity and to train workforce.
- 100 per cent FDI (automatic route) is allowed in the Indian textile sector
- Under Union Budget 2016-17, the government has allocated US$ 7.43 million for setting up integrated parks in India
- Free trade with ASEAN countries and proposed agreement with European Union will boost exports

Note: SITP - Scheme for Integrated Textile Park; FDI - Foreign Direct Investment, ASEAN - Association of Southeast Asian Nations, E – Estimate; F-Forecasted

The fundamental strength of the textile industry in India is its strong production base of wide range of fibre / yarns from natural fibres like cotton, jute, silk and wool to synthetic / man-made fibres like polyester, viscose, nylon and acrylic.

India accounts 63 per cent of the market share of textiles and garments.

With production of 6,106 million kg, India was the largest producer of cotton in 2016-17.

Indian textile industry accounts for about 24 per cent of the world’s spindle capacity and 8 per cent of global rotor capacity.

India has the highest loom capacity (including hand looms) with 63 per cent of the world’s market share.

India accounts for about 14 per cent of the world’s production of textile fibres and yarns (largest producer of jute, 2nd largest producer of silk and cotton; and 3rd largest in cellulosic fibre).

India is the 2nd largest producer of Manmade Fibre and Filament, globally, with production of around 2,11 million kg in 2016-17.

**Key segments of the textile industry**

- Raw material
- Ginning
- Spinning
- Weaving/knitting
- Processing
- Garment/apparel production

- Cotton, jute, silk, wool
- Fibre
- Yarn
- Fabric
- Processed fabric
- Final garment/Apparel

Yarn and fibre segment

- Woollen textiles
- Silk textiles
- Jute textiles
- Technical textiles

---

**Note:** Figures are as per latest data available  
**Source:** Textile Ministry, Make in India, 1 - Figures as of April-January 2016-17
THE SECTOR HAS BEEN POSTING STRONG GROWTH OVER THE YEARS

- Textile plays a major role in the Indian economy
  - It contributes 14 per cent to industrial production and 4 per cent to GDP
  - With over 45 million people, the industry is one of the largest source of employment generation in the country
- The industry accounts for nearly 15 per cent of total exports
- The size of India’s textile market in 2016 was around US$ 137 billion, which is expected to touch US$ 226 billion market by 2023, growing at a CAGR of 8.7 per cent between 2009-23E
- As of June 2017, the central government is planning to finalise and launch the new textile policy in the next three months. The policy aims to achieve US$ 300 billion worth of textile exports by 2024-25 and create an additional 35 million jobs.

Note: CAGR - Compound Annual Growth Rate, E – Estimated

India's textile market size (US$ billion)

Source: Technopak, Make in India, News articles, Ministry of Textiles, Aranca Research
COTTON PRODUCTION OVER THE PAST FEW YEARS HAS BEEN VOLATILE

- Production of raw cotton in India grew from 28 million bales in FY07 and further increased to 35.1 million bales in FY17.
- During FY07-17, raw cotton production expanded at a CAGR of 2.3 per cent.
- During FY16\(^1\), of the overall amount of raw cotton produced in the country, domestic consumption totalled to 30 million bales, while in FY15\(^1\), the domestic consumption of raw cotton stood at 30.4 million bales.
- Raw cotton and man-made fibres are major segments in this category.
- Raw wool and raw silk are other components – their production levels are much lower.

**Note:** CAGR - Compounded Annual Growth Rate, (1) Projected Data; One Bale - 170 kilogram

**Source:** The Cotton Corporation of India Ltd, Aranca Research
PRODUCTION OF MAN-MADE FIBRE HAS BEEN RISING

- Production of man-made fibre has also been on an upward trend
- Production stood at 1.347 million tonnes in FY16 with the figure reinforcing a recovery from 2009 levels
- During FY17\(^1\), production of man-made fibre in India stood at 1.36 million tonnes

Note: 1 - Provisional figures as of March 2017
Source: Ministry of Textiles
COTTON IS THE MAJOR SEGMENT IN YARN AND FABRIC … (1/2)

- Production of yarn grew to 5664.04 million Kgs in FY17 from 4712 million Kgs in FY11, implying a CAGR of 3.11 per cent
- Production of yarn between April to March’17 stood at 5664.04 million Kg
- Cotton yarn accounts for the largest share in total yarn production; in FY17, the segment’s share amounted to 71.66 per cent

**Note:** 1 - Provisional figures as of March 2017  
**Source:** Ministry of Textiles
COTTON IS THE MAJOR SEGMENT IN YARN AND FABRIC … (2/2)

- Fabric production in the country rose to 64,775 million square metre in FY17 from 52,665 million square metres in FY07, implying a CAGR growth of 2.09 per cent.
- Cotton yarn, a major segment in FY15, accounted for more than 57 per cent share in fabric production, with the share reaching to 59.98 per cent in FY17.
- Fibre production in India is expected to reach 10 million tonnes by 2017-18, growing from 9 million tonnes in 2015-16.
- Cotton’s high prices in 2016-17 will encourage farmers to grow more cotton in 2017-18. The area under cotton cultivation will increase by 7 per cent to reach 11.3 million hectares in 2017-18, due to better returns on improved crop yield in 2016-17.

Note: Figures mentioned are as per latest data available, 1 - Provisional figures till March 2017
Source: Ministry of Textiles, Aranca Research

For updated information, please visit www.ibef.org
Exports have been a core feature of India’s textile and apparel sector, a fact corroborated by trade figures.

Exports in textile and apparel sector stood at US$ 36.63 billion in FY17.

As of November 2016, the government has extended the duty drawback facility on all textile products and increased the rates in some cases for 1 year to boost exports in the sector.

The Goods and Services Tax that rolled out in July 2017 is expected to make imported garments cheaper by 5-6 per cent, as the GST regime will levy 5 per cent tax for both domestic textile manufacturers and importers.

Source: Ministry of Textiles, Budget 2015, Aranca Research
The domestic textile and apparel industry was the largest contributor to total textile and apparel exports from India in FY17. The segment had a share of 89.64 per cent. This segment includes readymade garments, jute, cotton, silk etc.

The handicrafts segment accounted for 10.06 per cent of the total exports in FY17.

**Note:** Others include coir and coir manufacturers and jute. **Data for April – September 2016**

### Porter’s Five Force Framework Analysis

#### Threat of Substitutes
- **High** – Low cost substitute products from countries like Pakistan and Bangladesh
- Threat from unorganised sector

#### Bargaining Power of Suppliers
- **Low** – Significant presence of small suppliers has reduced the bargaining power

#### Competitive Rivalry
- **High** – Intense competition between established brands and private label brands
- Industry is highly fragmented with organised sector contributing only 31 per cent in 2011

#### Threat of New Entrants
- **Medium** – 100 per cent FDI (automatic route) is allowed in the Indian textile sector
- A few large suppliers are focusing on forward integration

#### Bargaining Power of Buyers
- **High** – Major clothing brands have better bargaining power over textile manufacturers, as the product differentiation is low and number of players are high and fragmented

**Source:** Ministry of Textiles, Geotechnical
### STRATEGIES ADOPTED

**Focus on high growth domestic market**
- As of November 2016, the Ministry of Textiles signed MoUs with 20 e-commerce firms to engage with various handloom and handicraft clusters.
- In strategic alliance with importers from UAE, the 1st ever exhibition of, “Incredible Indian Textiles” was held in Dubai in February 2017. The event was organised by Synthetic and Rayon Textiles Export Promotion Council (SRTEPC) of India and witnessed participation of 19 Indian companies.
- In March 2017, Welspun India Ltd opened a new plant - Needle Entangled Advance Textile Plant in Anjar, Gujarat, to manufacture multi-layer composites for various applications. The plant is worth US$ 23.35 million.

**Focus on backward integration**
- During Textiles India 2017, the Ministry of Textiles signed 65 memorandum of understandings (MoUs). MoUs were signed between various domestic and international organizations from industry and government; three of the MoUs signed are G2G MoUs. The MoUs signed relate to exchange of information and documentation, Research & Development, commercialization of handloom products and silk production, cooperation in Geo textiles, skill development, supply of cotton and trade promotion with overseas partners, etc.

**Focus on forward integration**
- In February 2017, Future Retail, entered into an agreement with UK based home furnishing brand - Laura Ashley, to operate and own stores and websites in India.
- The Indian fashion retailers online market is poised to grow to US$ 30 billion by the 2020, currently the online market is valued at US$ 7-9 billion.

**Diversification**
- Raymond group under its group company J.K.Helene Curtis is looking to ramp up male grooming segment by unleashing new variants of shampoos and deos.

*Source: Annual Reports and Company Presentations, Aranca Research*
GROWTH DRIVERS
STRONG FUNDAMENTALS AND POLICY SUPPORT AIDING GROWTH

Growing demand
- Rising demand in exports
- Increasing demand in domestic market due to changing taste and preferences
- Growing population driving demand for textiles

Policy support
- Growing domestic and foreign investments
- Government setting up SITPs and Mega Cluster Zones
- Increasing loans under TUF

Increasing investments
- 100 per cent FDI in textile sector
- US$ 140 billion of foreign investments are expected
- Government investment schemes (TCIDS and APES)

Note: TCIDS - Textile Center Infrastructure Development Scheme, APES - Apparel Park for Exports Scheme
Note: Ministry of Textiles, Aranca Research
By 2014, India’s population had almost doubled compared to figures 30 years before

India’s growing population has been a key driver of textile consumption growth in the country

Moreover, according to World Bank, urban population accounts for 32.7 per cent of the total population of India. This also works as demand driver due to changing taste and preferences in the urban part of India

It has been complemented by a young population which is growing and at the same time is exposed to changing tastes and fashion

• Complementing this factor is rising female workforce participation in the country

Note: E – estimated
Source: World Bank, Aranca Research
RISING INCOMES AND A GROWING MIDDLE-CLASS HAVE BEEN KEY DEMAND DRIVERS

- Rising incomes has been a key determinant of domestic demand for the sector; with incomes rising in the rural economy as well, the upward push on demand from the income side is set to continue.
- Rising industrial activity would support the growth in the per capita income.

**Notes:** E - Estimate, F - Forecasts

**Source:** IMF, Mckinsey Global Institute, Aranca Research
EXPORTERS GAINING FROM STRONG GLOBAL DEMAND

- Capacity built over years has led to low cost of production per unit in India’s textile industry; this has lent a strong competitive advantage to the country’s textile exporters relative to key global peers.

- The sector has also witnessed increasing outsourcing over the years as Indian players moved up the value chain from being mere converters to vendor partners of global retail giants.

- The strong performance of textile exports is reflected in the value of exports from the sector over the years. Textile exports witnessed a growth (CAGR) of 8.56 per cent over the period of FY06 to FY16.

- In the coming decades, Africa and Latin America could very well turn out to be key markets for Indian textiles.

- In April 2017, the government unveiled Textiles India 2017, its 1st ever global B2B handicrafts and textile event, in Delhi. The event showcased a 1000 stalls, and saw about 1,600 buyers from more than 100 countries. Around 1,300 exhibitors and 2,000 delegates had registered for the event and total participation, including domestic buyers, artisans and visitors, crossed 6,000. During the second day of the event, the Ministry of Textiles signed 65 MoUs.

Notes: MoUs- Memorandums of Understanding
Source: Ministry of Textiles, Budget 2015
The major service offerings of the technical textile industry include thermal protection and blood-absorbing materials, seatbelts and adhesive tapes.

The technical textile industry is expected to expand at a CAGR of 13.11 per cent during FY18–23 to US$ 32 billion in FY23.

The targeted market size would be achieved by targeting non-woven technical textiles.

Healthcare and infrastructure sectors are major drivers of the technical textile industry.

India is expected to be a key growth market for the technical textile sector due to cost-effectiveness, durability and versatility of technical textiles.

The government has supported the technical textile industry with an allotment of US$ 1 billion for SMEs and an exemption in custom duty for raw materials used by the sector.

Notes: SME - Small and Medium Enterprises, E – Estimates; Figures mentioned are as per latest data available
Source: Chamber of Commerce, Indian Technical Textile Association, Aranca Research
India’s home textile industry is expected to expand at a CAGR of 8.3 per cent during 2014–21 to US$ 8.2 billion in 2021 from US$ 4.7 billion in 2014.

India accounts for 7 per cent of global home textiles trade. Superior quality makes companies in India a leader in the US and the UK, contributing two-third to their exports.

Indian products has gained a significant market share in global home textiles in the past few years.

The growth in the home textiles would be supported by growing household income, increasing population and growth of end use sectors like housing, hospitality, healthcare, etc.

In 2016, Indian home textile industry is estimated at US$ 5.5 billion.

**Notes:** E – Estimates

### Policy Support has been a Key Ingredient to Growth

<table>
<thead>
<tr>
<th>Category</th>
<th>Description</th>
</tr>
</thead>
</table>
| **Technology Up-gradation Fund Scheme (TUFS)**                           | - Investment was made to promote modernisation and up-gradation of the textile industry by providing credit at reduced rates  
- US$0.23 billion has been allocated for ATUFS scheme for FY16-17, under Union Budget 2016-17  
- In April 2017, StalkBuyLove, an online fashion brand, has raised US$ 1 million venture debt from Trifecta Capital, to expand its team and strengthen the supply chain technology. |
| **National Textile Policy - 2000**                                      | - Key areas of focus include technological upgrades, enhancement of productivity, product diversification and financing arrangements  
- New draft for this policy ensures to employ 35 million by attracting foreign investments. It also focuses on establishing a modern apparel garment manufacturing centre in every North Eastern state for which Government has invested an amount of US$ 3.27 million |
| **Foreign Direct Investment**                                           | - FDI of up to 100 per cent is allowed in the textile sector through the automatic route |
| **Scheme for Integrated Textiles Parks (SITP)**                        | - SITP was set up in 2005 to provide necessary infrastructure to new textile units; under SITP, 40 projects (worth US$ 678 million) have been sanctioned  
- Out of these 40 projects, 27 have started production. 16 projects has been completed in November 2014. Government has invested a total of US$ 21.96 million for 21 new textile parks and the remaining 13 textile parks has been given the in-principle approval under SITP. In 2015, textile parks set up under the Scheme for Integrate Textile Park (SITP) attracted an investment of US$ 4.58 billion. |
| **Technical textile industry**                                          | - Government of India has planned an increase in the fund outlay for technical textiles industry to more than US$ 117 million during the current 12th Five Year Plan (2012-17) |

FOREIGN INVESTMENTS FLOWING INTO THE SECTOR

- 100 per cent FDI is approved in the sector
- Indian textile industry experienced noticeable growth in FY17, as FDI in the sector increased to US$ 2471.42 million in FY17 from US$ 1852.47 million in FY16
- During FY10-17, FDI in textiles and apparel industry grew at a CAGR of 17.13 per cent
- The textiles industry in India is experiencing a significant increase in collaboration between global majors and domestic companies
- International apparel giants, such as Hugo Boss, Liz Claiborne, Diesel and Kanz, have already started operations in India

Source: Ministry of Commerce and Industry, DIPP, Aranca Research
OPPORTUNITIES
OPPORTUNITIES … (1/2)

Immense growth potential

- The Indian textile industry is set for strong growth, buoyed by both strong domestic consumption as well as export demand
- The sector is expected to reach US$ 226 billion by FY2023
- Population is expected to reach to 1.34 billion by FY2019
- Urbanisation is expected to support higher growth due to change in fashion and trends

Private sector participation in silk production

- The Central Silk Board sets targets for raw silk production and encourages farmers and private players to grow silk
- To achieve these targets, alliances with the private sector, especially major agro-based industries in pre-cocoon and post-cocoon segments has been encouraged

Proposed FDI in multi-brand retail

- For the textile industry, the proposed hike in FDI limit in multi-brand retail will bring in more players, thereby providing more options to consumers
- It will also bring in greater investments along the entire value chain – from agricultural production to final manufactured goods
- With global retail brands assured of a domestic foothold, outsourcing will also rise significantly
OPPORTUNITIES … (2/2)

Retail sector offers growth potential

- With consumerism and disposable income on the rise, the retail sector has experienced a rapid growth in the past decade with several international players like Marks and Spencer, Guess and Next having entered Indian market.
- The organised apparel segment is expected to grow at a Compound Annual Growth Rate of more than 13 per cent over a 10-year period.
- India and Bangladesh plans to increase their cooperation in order to increase promote the investment and trade of jute and fabrics.
- Future Group plans to expand with 80 stores in order to reach the target sales of 80 million units. This would add to their portfolio of 300 stores spread across the country.

Centers of Excellence (CoE) for research and technical training

- The CoEs are aimed at creating testing and evaluation facilities as well as developing resource centres and training facilities.
- Existing 4 CoEs, BTRA for Geotech, SITRA for Meditech, NITRA for Protech and SASMIRA for Agrotech, would be upgraded in terms of development of incubation centre and support for development of prototypes.
- Fund support would be provided for appointing experts to develop these facilities.

Foreign investments

- The government is taking initiatives to attract foreign investments in the textile sector through promotional visits to countries such as Japan, Germany, Italy and France.
- According to the new Draft of the National Textile Policy, the government is planning to attract foreign investments thereby creating employment opportunities to 35 million people.
